

Atlanta Pediatric Dentist Launches New Range Of Services

March 01, 2016

March 01, 2016 - PRESSADVANTAGE -

Dr. Wesley Powell of Dentistry for Children and Teens in Atlanta, Georgia, has announced a new kind of dental services dedicated to patients under the age of 18. The dental practice focuses on pediatric dentistry, with a strong focus on complete dental health.

The pediatric dentist Atlanta residents may depend on states, "We offer a full spectrum of children's dental services, all designed to protect teeth and gums throughout childhood."

Wesley Powell, DDS, is a board certified dentist offering a full range of services that include sealants, restorations, cleanings, fillings, teeth whitening, and orthodontics. The dental practice also specializes in helping children who are normally nervous when it comes to sitting in the dental chair.

"We offer sedation dentistry for our younger patients," states the childrens dentist Atlanta residents go to. "From oral and IV sedation to laughing gas, we want to ensure that all of our patients are relaxed enough to obtain the dental care that is vital to their overall well-being."

Dr. Powell has served as the representative in Atlanta for Procter and Gamble and Crest for Children's Dental Awareness Month. He states that his goal, and that of his practice, is to ensure that children in the area receive the dental care needed to ensure that their teeth and gums remain healthy, which he says helps them to prepare for a much healthier adulthood.

This pediatric dentist Atlanta and Decatur, GA residents depend on, offers services that are specifically designed to protect and repair teeth and gums from damage. Dr. Powell insists that taking good care of teeth and gums during childhood years is critical for ensuring that permanent teeth last longer in adulthood. He states that children who visit the dentist regularly during their younger years maintain much healthier teeth and gums when they grow older, often ensuring that no dentures are needed at all in their twilight years.

Those interested in learning more about the pediatric dentist can visit the dental practice on their official website. Dr. Powell recommends that parents begin taking their children to the dentist at around school age, and urges parents to schedule an appointment for any school age child who has never received dental care.
