Gateway Restoration Expands Service Portfolio with Comprehensive Emergency Plumbing Solutions

September 30, 2025

September 30, 2025 -
Gateway Restoration, a damage restoration company, has expanded its service offerings to include comprehensive emergency plumbing solutions alongside its established restoration services. The expansion addresses the growing need for integrated emergency response services that can handle both immediate plumbing issues and subsequent property damage restoration.

The expanded plumbing division offers round-the-clock emergency response for burst pipes, appliance leaks, clogged drains, sewer backups, and water line failures. These services complement the company's existing water damage restoration, mold remediation, and fire damage recovery capabilities, creating a more comprehensive emergency response solution for residential and commercial property owners throughout the Phoenix metropolitan area.

"Adding dedicated plumbing services to our restoration portfolio allows us to address property emergencies from initial incident through complete restoration," said Danjee Moser, a spokesperson for Gateway Restoration. "When a pipe bursts or a water heater fails, property owners need immediate plumbing expertise followed by professional water damage mitigation. We can now provide both services seamlessly, reducing response time and minimizing property damage."

The expanded service offering includes leak detection and repair for appliances and fixtures, drain cleaning, slab leak detection, water heater leak repair, and sewer backup cleanup. These services are available 24 hours a day, seven days a week, matching the company's existing emergency restoration response availability.

Gateway Restoration has invested in specialized plumbing equipment and training to ensure its technicians can handle both routine maintenance and emergency situations. The company maintains IICRC certification for its restoration services and has added licensed plumbers to its team to deliver professional plumbing

solutions.

The integration of plumbing and restoration services addresses a common challenge faced by property owners during water-related emergencies. Previously, customers often needed to coordinate between multiple contractors to stop active leaks and then address the resulting water damage. The expanded service model eliminates this coordination burden while potentially reducing overall recovery time and costs.

The company serves Chandler, Mesa, Tempe, Scottsdale, Phoenix, and surrounding communities, including Avondale, Apache Junction, Florence, Fountain Hills, Glendale, Queen Creek, San Tan Valley, and Tolleson. All services are backed by the company's established insurance claim assistance program, which helps property owners navigate the documentation and filing process.

Gateway Restoration has operated in the Phoenix metropolitan area for nine years, maintaining an A+ rating with the Better Business Bureau and a 4.8-star rating on Google reviews. The company specializes in water damage restoration, fire and smoke damage recovery, mold remediation, asbestos abatement, and storm damage repair. Additional services include general construction, demolition, remodeling, and sewage cleanup. The company's licensed and certified technicians provide both emergency response and planned restoration services for residential and commercial properties throughout central Arizona.
