

Keathley Landscaping Expands Custom Cedar Fencing and Drainage Services

October 02, 2025

GARLAND, TX - October 02, 2025 -
Keathley Landscaping, a landscaping company serving North Texas since 2002, announces the expansion of its specialized cedar fencing installation and yard drainage services throughout the region. The company brings over two decades of expertise to address growing demand for quality outdoor improvements and water management solutions.

The expansion comes as Texas homeowners increasingly seek professional solutions for outdoor drainage problems and desire durable, aesthetically pleasing fence installations. Keathley Landscaping's enhanced service offerings combine traditional craftsmanship with modern drainage technology to provide comprehensive landscape solutions.

As an NDS Certified Drainage Contractor, the company specializes in resolving complex water management challenges that can threaten property foundations and landscape integrity. The team provides custom drainage plans, French drain installations, grading services, and buried drainage pipe systems tailored to

each property's unique topography and needs.

"Property owners often don't realize how critical proper drainage solutions are until water damage occurs," said Logan Keathley, NDS Certified Drainage Contractor and founder of Keathley Landscaping. "We've developed innovative approaches to solve even the most challenging drainage problems while maintaining the aesthetic appeal of the landscape. Our goal is to protect homes from water damage while creating beautiful, functional outdoor spaces."

The company's cedar fencing services have become increasingly popular among homeowners seeking both privacy and natural beauty. Cedar wood offers natural resistance to decay and insects, making it an ideal choice for Texas weather conditions. The company provides various styles ranging from traditional picket designs to contemporary horizontal configurations, each custom-built to complement the property's architecture.

Keathley Landscaping's comprehensive approach includes initial property assessment, custom design development, professional installation, and thorough final inspection. This systematic process ensures each project meets both functional requirements and aesthetic preferences while adhering to local building codes and regulations.

Beyond fencing and drainage, the company offers additional landscaping services, including stonework, retaining walls, outdoor living spaces, and flowerbed borders. The integration of these services allows property owners to coordinate multiple improvements through a single contractor, ensuring design consistency and project efficiency.

The expansion particularly focuses on serving communities throughout Dallas, Garland, Wylie, Plano, Rockwall, and surrounding areas. Each location receives the same commitment to quality craftsmanship and customer service that has defined the company's reputation over the past two decades.

Keathley Landscaping maintains its position as a full-service landscaping contractor by continuously adapting to evolving customer needs and industry standards. The company's team undergoes regular training to stay current with installation techniques, materials, and drainage technology advancements.

Founded in 2002, Keathley Landscaping has established itself as a landscaping contractor in North Texas. The company specializes in landscape design and construction, hardscape installation, drainage solutions, and ongoing maintenance services. With a focus on quality craftsmanship and customer satisfaction, Keathley Landscaping continues to help property owners achieve their vision for outdoor spaces while

addressing practical concerns such as water management and property protection.
