

Go Industries Inc Unveils Flat Iron Heavy Duty Headache Racks for Commercial Work Trucks

October 03, 2025

Richardson, TX - October 03, 2025 -
Go Industries Inc, a Richardson, Texas-based manufacturer of truck accessories and protection equipment, has unveiled its Flat Iron series of heavy-duty headache racks designed specifically for commercial work trucks. The new product line addresses the growing demand for durable cargo protection solutions across major truck brands including Chevrolet, Dodge, Ford, GMC, and Toyota.

The Flat Iron series represents a significant advancement in cargo protection technology for the commercial trucking industry. Constructed with vertical uprights made from half-inch by three-inch flat steel and cross tubes of two-inch square, 14-gauge steel, these headache racks are engineered to withstand the rigorous demands of daily commercial use. The feet components, measuring three-sixteenths by three by 24 inches in steel construction, provide exceptional stability and mounting strength.

"The Flat Iron series demonstrates our commitment to providing commercial-grade protection solutions that meet the evolving needs of today's work truck operators," said a Go Industries spokesperson. "With built-in

tie-down points integrated directly into the feet design, we've created a product that not only protects vehicle windows from shifting cargo but also enhances overall load security and operational efficiency."

The new product line features three universal applications designed to fit all full-size pickup trucks, streamlining inventory requirements for fleet operators and equipment suppliers. Each unit comes with a choice of white or black powder coat finish, allowing customers to match their existing vehicle aesthetics or company branding requirements.

Go Industries backs the Flat Iron series with a comprehensive warranty program, offering three years of coverage on materials and workmanship, along with six months of protection for the finish. This warranty structure reflects the company's confidence in the durability and longevity of their manufacturing processes.

The introduction of the Flat Iron series aligns with broader industry trends toward enhanced safety standards and cargo management solutions in the commercial trucking sector. As regulations continue to evolve regarding load security and driver protection, products like these headache racks serve a critical role in maintaining compliance while protecting valuable equipment investments.

Manufacturing all products domestically at their Texas facility, Go Industries maintains strict quality control standards throughout the production process. The company's Platinum Status with SEMA (Specialty Equipment Market Association) underscores their commitment to excellence in automotive aftermarket manufacturing.

Since 1978, Go Industries Inc has established itself as a leading provider of truck accessories, law enforcement equipment, and custom manufacturing solutions. The company's product portfolio includes grille guards, winch application systems, bumper replacements, air flow tailgates, mud flaps, and steps, in addition to their expanding line of protective equipment. Their custom manufacturing capabilities allow them to serve specialized market segments requiring unique specifications beyond standard product offerings.
