

Go Industries Inc Expands Winch Grille Guard Systems for Ford and Commercial Trucks

October 07, 2025

Richardson, TX - October 07, 2025 -
Go Industries Inc, a Richardson, Texas-based manufacturer of truck protection equipment, has expanded its commercial-grade winch grille guard offerings with enhanced modular systems designed to meet the evolving needs of fleet operators and commercial vehicle owners.

The expanded product line features modular-style grille guards that serve as a foundation for integrated winch carriers and brush guards, addressing increased demand for versatile protection systems across commercial trucking operations. The systems accommodate both 9.5 and 16.5 winch carriers, providing flexibility for various commercial applications including recovery operations, construction sites, and emergency response vehicles.

Constructed from 5/16-inch laser-cut steel uprights and 2.5-inch 16-gauge steel cross tubes, the winch grille guard systems deliver robust protection for commercial vehicles. The design incorporates custom heavy-duty mounting brackets engineered for maximum strength while simplifying installation procedures for fleet

maintenance teams. Optional brush guards complement vehicle aesthetics while providing additional headlight protection from road debris and off-road hazards.

"Our expanded winch grille guard systems reflect our commitment to providing comprehensive protection solutions that adapt to the diverse requirements of commercial truck operators," said a Go Industries spokesperson. "The modular design allows fleet managers to customize their vehicles based on specific operational needs while maintaining the durability and protection standards essential for work truck safety."

The expansion comes as commercial trucking operations increasingly prioritize vehicle protection and recovery capabilities. Fleet operators managing vehicles across multiple job sites require equipment that can withstand daily commercial use while maintaining functionality for emergency situations. The modular approach allows organizations to standardize protection equipment across their fleets while customizing individual vehicles for specialized tasks.

Go Industries backs the expanded product line with a three-year warranty covering materials, workmanship, and finish, demonstrating confidence in the manufacturing quality of these American-made products. The warranty structure provides fleet operators with predictable maintenance costs and reduced downtime concerns.

The winch grille guard systems are available for multiple vehicle applications, including popular commercial models such as the grille guard Ford F650 and F750 series, Chevrolet C4500 and C6500, and International CV515. This broad compatibility ensures fleet operators can maintain consistent protection standards across diverse vehicle inventories.

Manufacturing operations at the company's Texas facility utilize advanced laser-cutting technology and precision welding techniques to maintain consistent quality standards. Each unit undergoes rigorous testing to ensure compliance with commercial vehicle safety requirements and industry standards for protective equipment.

Go Industries Inc has been manufacturing truck accessories, law enforcement equipment, and custom protection solutions since 1978. The company's product portfolio encompasses front and rear vehicle protection systems, including grille guards, bumper replacements, headache racks, and specialized equipment for law enforcement vehicles. Their custom manufacturing capabilities enable them to serve specialized market segments requiring unique specifications beyond standard product offerings.
