

Keathley Landscaping Expands Residential Yard Drainage and Cedar Fencing as Demand Grows

October 08, 2025

GARLAND, TX - October 08, 2025 -
Keathley Landscaping, a full-service landscaping company serving Dallas and surrounding Texas communities, has expanded its specialized drainage solutions and cedar fencing installation services to meet growing demand from homeowners dealing with water management challenges and property enhancement needs.

The expansion comes as Texas homeowners increasingly face drainage complications from unpredictable weather patterns and seek durable fencing solutions that withstand the state's climate conditions. The company, led by NDS Certified Drainage Contractor Logan Keathley, brings advanced expertise in solving complex yard drainage problems that can cause significant property damage if left unaddressed.

"Homeowners often don't realize that flooding and water damage from poor drainage typically isn't covered by standard insurance policies," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "We've expanded our drainage services to help more Texas families protect their investments

through proper water management solutions, from French drains and grading to custom-designed buried drainage pipe systems."

The company's drainage solutions address a critical need in Texas communities where improper water flow can damage foundations, destroy landscaping, and create hazardous conditions. As an NDS Certified Drainage Contractor, Keathley brings specialized training and certification in drainage system design and installation, ensuring each property receives a customized solution based on its unique topography and water flow patterns.

Alongside drainage services, the company has enhanced its cedar fence installation offerings, recognizing the material's natural advantages in Texas weather conditions. Cedar's inherent resistance to decay and insects, combined with minimal maintenance requirements, makes it particularly suitable for Texas properties where durability and longevity are essential considerations.

The expanded services complement Keathley Landscaping's comprehensive outdoor offerings, which include sod installation, landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, patio covers, outdoor kitchens, firepits, and tree services. This integrated approach allows homeowners to address multiple outdoor needs through a single, experienced contractor.

Each drainage project begins with a detailed property assessment to understand the unique characteristics of the landscape and develop tailored solutions. The company's approach focuses on practical, cost-effective remedies that solve drainage issues permanently rather than providing temporary fixes that require repeated attention.

The expansion reflects growing recognition among Texas homeowners about the importance of proper drainage infrastructure and quality fencing in maintaining property value and preventing costly damage. With severe weather events becoming more frequent, professional drainage solutions have shifted from optional improvements to essential property protection measures.

Keathley Landscaping has served the Dallas area since 2002, building a reputation for reliable workmanship and attention to detail across its range of outdoor services. The company serves Dallas, Garland, Wylie, Plano, Rockwall, and surrounding Texas communities, providing both residential and commercial landscaping solutions designed to enhance outdoor spaces while addressing practical concerns like water management and property boundaries.
