

## **Go Industries Inc Expands Winch Grille Guards Offerings with Enhanced Modular Systems for Trucks**

*October 22, 2025*

Richardson, TX - October 22, 2025 - PRESSADVANTAGE -

Go Industries Inc, a Richardson, Texas-based manufacturer of heavy-duty truck accessories, announces the expansion of its commercial-grade winch grille guard product line with enhanced modular systems designed to meet the growing demands of commercial and industrial truck operators.

The expanded product offerings feature modular-style grille guards that serve as a foundation for integrated winch carriers and brush guards, addressing the need for versatile front-end protection solutions in the commercial trucking sector. The systems are constructed from 5/16-inch laser-cut steel uprights paired with 2.5-inch, 16-gauge steel cross tubes, providing robust protection for vehicles operating in demanding environments.

The enhanced winch grille guards for trucks incorporate custom heavy-duty mounting brackets engineered for maximum strength and simplified installation. The modular design allows fleet operators and individual truck owners to customize their front-end protection based on specific operational requirements, with optional

brush guards that provide additional protection to headlight areas from road debris and off-road brush.

"Our expanded winch grille guard systems reflect our commitment to providing commercial-grade solutions that meet the evolving needs of truck operators across various industries," said a Go Industries Inc spokesperson. "The modular design approach allows customers to build a protection system that precisely matches their operational requirements, whether they're managing a commercial fleet or outfitting a single work truck."

The product line includes compatibility with 9.5 and 16.5 winch carriers, enabling users to integrate recovery equipment directly into their front-end protection system. This integration eliminates the need for separate winch mounting solutions and creates a unified approach to vehicle protection and recovery capabilities.

Go Industries Inc backs the expanded product line with a three-year warranty covering materials, workmanship, and finish. All components are manufactured in the United States at the company's Texas facility, ensuring quality control and supporting domestic manufacturing.

The expansion comes as demand for integrated truck protection systems continues to grow across construction, agriculture, and emergency services sectors. Industry data indicates increased interest in modular truck accessories that can be adapted to multiple vehicle configurations and operational needs.

Go Industries Inc has been manufacturing truck accessories and law enforcement equipment since 1978. The company specializes in front and back-end protection systems, including grille guards, bumper replacements, headache racks, and custom manufacturing solutions. Beyond its commercial truck accessories, Go Industries Inc provides specialized equipment for law enforcement vehicles and offers custom manufacturing services for clients with specific design requirements. The company maintains Platinum Status with SEMA, recognizing its commitment to quality and innovation in the automotive aftermarket industry.
