

All In Solutions Wellness Center Reports 83 Percent Program Completion Rate Exceeding National Standards

October 30, 2025

WEST PALM BEACH, FL - October 30, 2025 -
All In Solutions Wellness Center has reported that 621 of 745 inpatients successfully completed their treatment programs in 2024, achieving an 83 percent completion rate that significantly surpasses the national average of 52 percent recorded in 2018. The Joint Commission-accredited facility attributes this achievement to its comprehensive approach to addiction treatment and personalized care protocols.

The treatment center, which operates multiple locations including All In Solutions Wellness Center in West Palm Beach, provides medical detoxification and residential treatment programs. Each client receives an individually designed treatment plan based on their specific needs, medical history, and psychological assessment.

"A high completion rate signals the effectiveness of our personalized care and the strength of our supportive environment?every completed stay represents a step toward sustained healing," said Jose Desmarais, APRN

at All In Solutions Wellness Center.

Program completion rates serve as a critical metric in addiction treatment, as clients who complete their recommended course of care demonstrate significantly better long-term recovery outcomes compared to those who leave treatment early. The national average completion rate of 52 percent, based on 2018 data from the Substance Abuse and Mental Health Services Administration, highlights the challenge many facilities face in keeping clients engaged throughout their recovery journey.

All In Solutions Wellness Center's completion rate of 83 percent reflects the facility's structured approach to treatment transitions. Clients move seamlessly from medical detoxification to residential treatment, with each phase building upon the previous one. The center's primary therapists work closely with clients to identify and address individual recovery goals while maintaining continuity of care throughout the treatment process.

The facility's comprehensive service offerings include specialized components such as faith-based recovery tracks, integrated family therapy, and trauma-focused treatment. These additional therapeutic modalities allow clients to address underlying issues that often contribute to substance use disorders while building a strong foundation for sustained recovery.

With over 11 years of experience in addiction treatment and more than 7,700 alumni, the organization of All In Solutions has established protocols that support client engagement and retention. The alumni support program provides ongoing connection and resources for individuals who have completed treatment, reinforcing the recovery skills developed during their stay.

The treatment center's accreditation by the Joint Commission and membership in the National Association of Addiction Treatment Providers reflect its commitment to maintaining high standards of care across all programs. These credentials require regular evaluation of treatment outcomes and adherence to evidence-based practices in addiction medicine.

All In Solutions Wellness Center in West Palm Beach, Florida, operates as a comprehensive addiction treatment provider, offering medical detoxification and rehabilitation services in private residential settings. The facility specializes in creating individualized treatment plans that address both the physical and psychological aspects of addiction, utilizing evidence-based therapies and integrated treatment approaches to support lasting recovery.
