All In Solutions California Reinforces Commitment to Evidence-Based Outpatient Recovery Programs

November 13, 2025

SIMI VALLEY, CA - November 13, 2025 -
All In Solutions California continues to strengthen its comprehensive addiction treatment services in Simi Valley, emphasizing personalized care pathways that adapt to individual recovery needs through flexible outpatient programs. The treatment center's integrated approach combines evidence-based therapies with family involvement and holistic support systems to create sustainable recovery outcomes for individuals struggling with substance use disorders.

The facility's multi-tiered outpatient structure includes Partial Hospitalization Programs (PHP), Intensive Outpatient Programs (IOP), and standard outpatient services, each designed to meet clients at their specific stage of recovery. This flexible framework allows individuals to receive appropriate levels of care while maintaining connections to their community and support networks in CA.

All In Solutions California in Simi Valley integrates trauma-informed care with traditional therapeutic modalities, incorporating individual therapy sessions, group counseling, and specialized family therapy components. The treatment center's approach addresses both substance use disorders and co-occurring mental health conditions through comprehensive assessment and individualized treatment planning.

"By combining evidence-based therapy, family involvement, and holistic support, All In Solutions California ensures clients have the tools and community they need to maintain recovery," said Mia Werksman, Licensed Therapist, LMFT.

The center's PHP provides structured therapeutic services during daytime hours for individuals who benefit from intensive treatment without requiring 24-hour supervision. This program includes individual and group therapy sessions, family therapy opportunities, and medication management when appropriate. Clients participating in PHP receive comprehensive support while returning home each evening, maintaining important family connections throughout their treatment journey.

The IOP at All In Solutions California offers additional flexibility for those transitioning from higher levels of care or seeking treatment while managing work or educational commitments. Meeting several times per week, the IOP focuses on relapse prevention strategies, coping skill development, and addressing underlying mental health concerns that may contribute to substance use patterns.

Recovery at All In Solutions California extends beyond traditional therapeutic interventions to include mindfulness practices, recreational activities, and alumni support programming. The treatment center emphasizes whole-person healing through integrated services that address physical, emotional, and spiritual aspects of recovery. Weekly recreational outings and daily transportation to community support meetings help clients build connections and develop healthy lifestyle patterns.

The facility's trauma-focused treatment components recognize the significant relationship between traumatic experiences and substance use disorders. Through specialized therapeutic approaches, clients process past experiences while developing healthy coping mechanisms and emotional regulation skills essential for long-term recovery.

All In Solutions California serves as a premier addiction treatment provider in Southern California, offering evidence-based care for various substance use disorders including alcohol, opioid, stimulant, and benzodiazepine dependencies. The center accepts most private insurance plans and provides confidential insurance verification services to help individuals understand their coverage options. With additional locations throughout California, New Jersey, and Florida, the organization maintains its commitment to accessible, quality addiction treatment services that support lasting recovery.
