

USA Cabinet Store Announces Top Remodeling Projects Achieve Perfect Satisfaction Scores in National Industry Study

October 03, 2025

FAIRFAX, VA - October 03, 2025 -
USA Cabinet Store, a kitchen and bath remodeling service provider with 13 showrooms across multiple states, announces that recent National Association of the Remodeling Industry (NARI) data confirms kitchen renovations have achieved the highest homeowner satisfaction ratings among all home improvement projects, validating the company's focus on comprehensive kitchen remodeling services.

The NARI study revealed that kitchen remodeling achieved a perfect 10 Joy Score, the highest satisfaction rating possible, with 48 percent of real estate professionals now recommending kitchen upgrades before listing properties. This data arrives as the home remodeling industry reached $603 billion in spending during 2024, demonstrating strong consumer confidence in home improvement investments.

The findings particularly resonate in Northern Virginia markets, where median home prices have reached $643,000 and properties sell within an average of 50 days. These market conditions have prompted

homeowners to invest in renovating their existing properties rather than navigating the competitive real estate market.

"The NARI data confirms what we've observed across our 1,000-plus completed projects - that kitchen remodeling done right delivers exceptional value and satisfaction for homeowners," said Emin Halac, a representative from USA Cabinet Store. "With 64 percent of homeowners reporting they want to spend more time at home after renovation and 46 percent experiencing increased daily enjoyment, the impact extends far beyond property values."

USA Cabinet Store's white-glove service model addresses a critical finding from the NARI research showing that 57 percent of contractors report increased project scope during renovations. By providing comprehensive planning through 3D virtual reality design services, USA Cabinet Store helps homeowners visualize their complete project before construction begins, preventing costly mid-project changes.

Financing trends identified in the study indicate that 54 percent of homeowners use home equity for remodeling projects while 29 percent utilize savings, positioning Northern Virginia homeowners as particularly well-equipped for renovation investments. The research also found that 92 percent of homeowners would undertake additional remodeling projects if cost constraints were removed, highlighting the importance of efficient project management and bundled services.

The company has established itself as a comprehensive solution provider for homeowners seeking remodeling kitchen and bath projects. The company maintains BBB accreditation and a 4.8-star rating, with more than 900 satisfied customers according to recent trust index reports. Their approach combines design consultation, product selection, and installation services under one coordinated system.

USA Cabinet Store operates across Virginia, Maryland, North Carolina, Texas, New Jersey, Florida, and Tennessee, offering kitchen cabinets, bathroom cabinets, countertops, tiles, sinks, faucets, and hardware from leading manufacturers. The company specializes in transforming outdated spaces into modern, functional areas through custom cabinet installations, premium materials, and diverse style options that combine functionality with design aesthetics.

Since 2011, USA Cabinet Store has focused on converting client visions into reality through professional remodeling solutions and quality product installations. Their showrooms feature extensive displays where customers can explore design options and receive professional consultations for complete kitchen and bathroom transformations.
