

RestoPros of North & Central New Jersey Expands Comprehensive Damage Restoration Services

October 08, 2025

MORRISTOWN, NJ - October 08, 2025 -
RestoPros of North & Central New Jersey has expanded its comprehensive damage restoration services to better serve residential and commercial clients throughout the region. The Morristown-based restoration company continues to strengthen its emergency response capabilities while maintaining round-the-clock availability for property damage incidents.

The expansion encompasses enhanced service delivery across the company's five core restoration specialties, including water damage restoration, fire and smoke damage restoration, mold remediation, storm damage restoration, and complete restoration and rebuild services. With over 30 years of combined industry experience, the company maintains certification through the Institute of Inspection, Cleaning and Restoration Certification (IICRC) standards.

"Property damage can occur at any moment, and our expanded services ensure that residents and businesses throughout North and Central New Jersey have immediate access to professional restoration

support," said Owen Lee, spokesperson for RestoPros of North & Central New Jersey. "Our team understands the stress and disruption that water, fire, or storm damage can cause, and we have structured our operations to provide the fastest possible response while maintaining the highest quality standards."

Water Damage Restoration remains a critical service area for the company, addressing incidents ranging from pipe bursts to flooding events. The restoration team employs advanced moisture detection equipment and industrial-grade drying systems to prevent secondary damage and mold growth. Each water damage situation receives a customized mitigation plan based on the specific circumstances and extent of the damage.

The company's fire and smoke damage restoration services address both immediate emergency needs and long-term restoration requirements. Technicians trained in smoke odor removal and structural cleaning work to restore properties to pre-loss condition. Similarly, the storm damage restoration division provides rapid response following severe weather events, addressing everything from wind damage to flooding.

Mold remediation services have become increasingly important as property owners recognize the health risks associated with mold growth following water damage incidents. The company implements comprehensive mitigation strategies to identify, contain, and eliminate mold growth while addressing the underlying moisture issues that enable its development.

The restoration and rebuild division manages complete reconstruction projects, coordinating all aspects of returning properties to their original condition. This comprehensive approach eliminates the need for property owners to manage multiple contractors during the recovery process.

RestoPros of North & Central New Jersey serves an extensive geographic area throughout the region, maintaining the equipment and personnel necessary for simultaneous emergency responses. The company provides free inspections and detailed quotes for all restoration services, ensuring transparency in pricing and scope of work.

Based in Morristown, the company has established itself as a restoration partner for both insurance companies and property owners. The combination of technical expertise, industry certification, and commitment to customer service has positioned the company as a leading restoration service provider in the region.
