Dr. Adam Foleck Spotlights Cutting-Edge AI in Implant Dentistry at 2025 Dentsply Sirona Convention

October 06, 2025

NORFOLK, VA - October 06, 2025 -
Dr. Adam Foleck, founder of The Foleck Center and a nationally recognized authority in implant dentistry, was featured as a guest speaker at the 2025 Dentsply Sirona Convention, held September 24?27 at the MGM Grand in Las Vegas.

Invited to present alongside some of the world?s foremost dental experts, Dr. Foleck delivered an engaging lecture on Pearl AI, a breakthrough technology that provides real-time, patient-facing analysis of both 2D and 3D radiographic images. His session demonstrated how artificial intelligence is reshaping the future of implant dentistry by offering clinicians enhanced diagnostic confidence, improving surgical planning, and empowering patients to take an active role in their treatment decisions.

The Dentsply Sirona Convention, widely recognized as one of the largest and most influential gatherings in dentistry, attracts thousands of professionals each year for advanced training, live demonstrations, and exposure to cutting-edge technologies. For Dr. Foleck to be chosen as a guest speaker at this prestigious event highlights not only his individual expertise but also the reputation of The Foleck Center as a progressive leader in patient-centered care.

Dr. Foleck?s presentation emphasized how AI-driven imaging tools are bridging the gap between clinical precision and patient communication. By automatically detecting and highlighting key anatomical features and potential issues in X-rays and CBCT scans, Pearl AI equips clinicians with data-driven insights that can be discussed with patients in real time. This technology has the potential to streamline diagnosis, increase case acceptance, and ultimately improve long-term implant outcomes.

?AI is not here to replace the clinician. It?s here to empower us,? Dr. Foleck told attendees. ?With Pearl?s real-time analysis, we can identify subtle challenges, refine implant planning, and most importantly, build trust by showing patients exactly what we see in their X-rays.?

His lecture included case studies from his own practice, demonstrating how these tools can help clinicians anticipate potential complications, such as nerve proximity, bone density variations, or sinus considerations, long before the patient is in the surgical chair. This not only improves patient safety but also contributes to greater efficiency in the dental office.

Dr. Adam S. Foleck, DMD, has dedicated nearly three decades to advancing the field of implant dentistry. After earning his dental degree from Temple University School of Dentistry in 1997, Dr. Foleck pursued extensive postgraduate training in implants, grafting procedures, and full-mouth rehabilitation. His clinical expertise is matched by his passion for education: since 2007, he has lectured internationally on implantology, grafting, and the integration of digital workflows into surgical practice.

In 2023, Dr. Foleck contributed to the textbook Modern Implant Dentistry, authoring the chapter ?Implants in the Esthetic Zone.? His insights have been widely regarded as valuable resources for clinicians navigating the challenges of achieving both functional and aesthetic outcomes in implant dentistry.

As the founder and clinical director of The Foleck Center, Dr. Foleck leads a multi-location practice with offices in Norfolk, Virginia Beach, and Hampton. The practice is well known throughout Hampton Roads for providing comprehensive dental care, including cosmetic, restorative, implant, and family dentistry. Delivered with a focus on innovation, education, and compassion.

At The Foleck Center, technology is not just about staying current. It?s about enhancing the patient experience. Under Dr. Foleck?s leadership, the practice has been an early adopter of digital imaging, CAD/CAM systems, and now artificial intelligence. These tools are seamlessly integrated into a philosophy of care that prioritizes transparency, comfort, and trust.

Patients visiting The Foleck Center can expect a modern, welcoming environment where cutting-edge treatments are paired with personalized attention. Dr. Foleck and his team take pride in helping patients

understand their treatment options, often using visual tools and advanced imaging to make complex procedures easy to grasp.

?Dentistry is about people, not just procedures,? Dr. Foleck often says. ?Our goal is to combine the best technology available with a compassionate approach that makes every patient feel confident and cared for.?

This commitment to blending innovation with empathy has made The Foleck Center a trusted name in Hampton Roads dentistry.

The Dentsply Sirona Convention (also known as DS World) is dentistry?s largest educational and technology event, bringing together clinicians, researchers, and innovators from across the globe. The 2025 event in Las Vegas featured a diverse program of lectures, workshops, and technology showcases that highlight the future of oral healthcare.

Pearl AI is a leading artificial intelligence platform designed to support dental practices through advanced radiographic analysis. By providing real-time insights on both 2D and 3D images, Pearl enhances diagnostic consistency, improves treatment planning, and helps patients understand their oral health needs more clearly.

Dr. Foleck?s participation at the Dentsply Sirona Convention underscores his reputation as both a clinician and educator dedicated to advancing the profession. For patients of The Foleck Center, it reaffirms the practice?s commitment to providing care informed by the very latest advancements in dental technology.
