

Tradingzone AG Expands Sustainable Office Furniture Solutions to Meet Growing Demand

October 09, 2025

REGENSDORF, CH - October 09, 2025 - PRESSADVANTAGE -

Tradingzone AG, Switzerland's largest provider of new and pre-owned office furniture, has expanded its sustainable furniture offerings and rental services to meet increasing demand from businesses seeking environmentally responsible workplace solutions. The company's circular economy model, which saves approximately 1,000 tons of CO₂ annually, continues to demonstrate the effectiveness of sustainable business practices in the office furniture industry.

Based in Regensdorf, Switzerland, Tradingzone AG operates an extensive showroom where businesses can explore a comprehensive range of office furniture options, from well-known international brands to the company's own product lines. The company's approach combines immediate availability with sustainable practices, addressing the dual challenges of rapid office setup needs and environmental responsibility.

The company's rental and subscription services have gained particular traction among businesses navigating office relocations, temporary space needs, or delayed furniture deliveries. Through their platform at

<https://www.tradingzone.ch>, companies can access flexible payment plans and minimal commitment periods, allowing them to adapt quickly to changing workspace requirements.

The expansion of services comes as Swiss businesses increasingly prioritize sustainability in their procurement decisions. Tradingzone AG's model rescues approximately 60 pieces of office furniture daily, giving them a second life through their 2nd Life label program. This environmental impact equals the annual heating requirements of approximately 200 single-family homes with oil heating systems.

Tradingzone AG focuses on the circular economy, striving to benefit both businesses and the environment by offering high-quality refurbished furniture alongside new pieces. The company offers other companies sustainable options that don't compromise on quality or aesthetics.

Tradingzone AG's subscription model, detailed at <https://www.tradingzone.ch/en/office-furniture-subscription>, provides businesses with a practical alternative to traditional furniture procurement. The service includes conference room furniture, reception area furnishings, and complete office setups, all available with flexible terms that support business liquidity and operational flexibility.

The company maintains a diverse inventory encompassing ergonomic office chairs, height-adjustable desks, storage solutions, acoustic panels, and lounge furniture. Each category includes both new products from recognized manufacturers and carefully refurbished pre-owned items that meet Swiss quality standards.

Beyond product offerings, Tradingzone AG provides comprehensive furnishing consultancy services, helping businesses create ergonomic and productive work environments. The company's expertise extends to large-scale projects and tender submissions, supporting organizations through complete office transformations.

The Regensdorf showroom, located at <https://maps.app.goo.gl/sK7uQ8oizDogkQLi6>, serves as a central hub where businesses can experience furniture options firsthand. The facility showcases the full spectrum of available products, from individual workstations to complete office solutions.

Tradingzone AG remains at the forefront of Switzerland's office furniture sector, driven by a commitment to sustainability, quality, and service excellence. The company's circular economy approach demonstrates that environmental responsibility and business success can work in harmony, providing Swiss businesses with furniture solutions that support both their operational needs and sustainability goals.
