

Fito Plumbers, Inc. Expands Sewer Lateral Services to Meet Stringent Requirements

October 13, 2025

LIVERMORE, CA - October 13, 2025 -
Fito Plumbers, Inc., a Bay Area plumbing contractor headquartered in Livermore, California, has expanded its specialized sewer lateral services for San Leandro residents, addressing a critical gap in available contractors who meet the city's exceptionally high insurance and licensing requirements.

San Leandro maintains some of the most stringent contractor requirements in the Bay Area, mandating $6 million in insurance coverage?three times the $2 million requirement of neighboring municipalities. This elevated standard has significantly limited the pool of qualified contractors available to homeowners needing essential sewer infrastructure work. Fito Plumbers, Inc. already maintains the necessary insurance coverage and specialized expertise, positioning the company to serve San Leandro property owners facing complex sewer lateral challenges.

The company's sewer lateral services encompass three primary categories: main sewer lateral replacement, crawlspace drain modernization, and lower lateral replacement. Each service utilizes advanced trenchless

technology, which minimizes disruption to existing landscaping and hardscaping while ensuring superior installation quality. This approach proves particularly valuable in San Leandro's established neighborhoods, where traditional excavation methods would significantly impact mature landscapes and paved surfaces.

"San Leandro residents have faced real challenges finding qualified contractors who meet the city's insurance requirements while also possessing the technical expertise for complex sewer lateral replacement," said Rosy Lopez, a spokesperson at Fito Plumbers, Inc. "Our expansion into San Leandro means homeowners now have access to a contractor that not only meets these requirements but also brings decades of experience in trenchless technology and municipal compliance."

Fito Plumbers, Inc. manages all aspects of municipal compliance for San Leandro projects, including proper permitting, traffic control measures, and restoration of affected surfaces to original condition. The company's comprehensive approach eliminates the burden on homeowners of navigating complex city requirements while ensuring all work meets or exceeds municipal standards.

The expansion comes as aging sewer infrastructure throughout the Bay Area requires increased attention. Many homes in San Leandro feature sewer laterals installed decades ago, now reaching the end of their serviceable life. Property owners face the dual challenge of addressing failing infrastructure while complying with strict municipal regulations designed to protect public health and environmental safety.

"The timing of our San Leandro expansion aligns with growing infrastructure needs throughout the region," added Lopez. "We're seeing increased demand for sewer lateral replacement as original clay and cast iron pipes deteriorate. Our trenchless methods allow us to complete these essential upgrades with minimal disruption to daily life."

Fito Plumbers, Inc. operates from locations in Livermore and Hayward, California, serving residential and commercial properties throughout the San Francisco Bay Area. The company provides comprehensive plumbing services, including private sewer lateral work, industrial and commercial plumbing, professional leak detection, sewer repair, horizontal directional drilling, and water heater services. As a licensed, bonded, and insured contractor, Fito Plumbers, Inc. maintains high ratings across multiple review platforms and offers 24/7 emergency services to Bay Area residents.
