GrassRoots Turf Opens New Lawn Care Franchise in Macon, GA

October 22, 2025

MACON, GA - October 22, 2025 -
GrassRoots Turf has expanded its professional lawn care and weed control services to serve residential and commercial properties throughout the Macon area. The expansion brings comprehensive turf management solutions to property owners seeking expert lawn care from certified technicians.

The company, operating as GrassRoots Turf of Macon, Ga, provides a full range of lawn care services including weed control, lawn aeration, mosquito control, tree and shrub care, and custom lawn disease programs. The expansion represents a significant investment in serving the region with professional-grade lawn care solutions.

"Our expansion into the Macon market allows us to bring over two decades of turf management expertise to local property owners," said Ray Pippin, owner of GrassRoots Turf of Middle Georgia. "We understand the unique challenges that Georgia lawns face, from persistent weed pressure to fungal diseases, and we have developed comprehensive treatment programs specifically designed for success in our local climate."

The company's service offerings address the most common lawn care challenges faced by property owners in Georgia. Their weed control program includes unlimited treatments backed by their Weed Free Guarantee, ensuring persistent weeds are eliminated throughout the growing season. The lawn aeration service helps combat soil compaction, a common issue in Georgia's clay soils, by allowing air, water, and nutrients to reach grass roots more effectively.

Beyond basic lawn care, the company provides specialized services including mosquito control treatments that protect outdoor spaces from disease-carrying pests, and custom lawn disease programs that address specific fungal issues common in the humid Southeast climate. Their tree and shrub care services include fertilization, disease control, and insect management to maintain healthy landscape plantings.

The company utilizes professional-grade granular and liquid fertilizers in its seasonal fertilization programs, tailoring nutrient applications to each lawn's specific needs. Their soil health and pH balancing services ensure optimal growing conditions, while preventative fungus and pest control applications protect lawns from common turf-damaging insects and diseases.

"What sets us apart is our commitment to providing comprehensive solutions rather than one-size-fits-all treatments," added Pippin. "Each property receives a customized treatment plan based on grass type, soil conditions, and specific challenges present on that lawn."

The company maintains an active presence in the community through https://www.facebook.com/GrassRootsTurfofMacon, where homeowners can stay informed about seasonal lawn care tips and service updates. Their certified lawn care technicians undergo continuous training to stay current with the latest turf management practices and environmental regulations.

GrassRoots Turf of Middle Georgia serves Macon, Warner Robins, Perry, Byron, Fort Valley, Forsyth, and Gray. The company has been providing lawn care services since 2002 and maintains memberships in several professional associations, including the National Association of Landscape Professionals, Georgia Mosquito Association, and Georgia Urban Agriculture Council. They offer free lawn evaluations to assess properties and recommend customized treatment plans based on individual lawn needs.
