

Evergreen Construction Expands Comprehensive Handyman Renovation Services

October 09, 2025

October 09, 2025 -
Evergreen Construction, a licensed and insured home remodeling company serving Southwest Missouri since 2022, announces the expansion of its comprehensive handyman services to meet growing demand for reliable property maintenance and repair solutions across the region. The company's enhanced service offerings address the increasing need for skilled professionals capable of handling diverse residential maintenance tasks.

The expansion comes as homeowners throughout Joplin, Carthage, Monett, and surrounding communities face challenges finding dependable contractors for smaller-scale repairs and maintenance projects. Evergreen Construction Handyman services now encompass everything from minor plumbing fixes and electrical repairs to drywall patching, fixture installations, and seasonal property maintenance tasks.

"Property owners often struggle to find qualified professionals for projects that fall between simple DIY tasks and major renovations," said Mason, spokesperson from Evergreen Construction. "Our expanded handyman

services bridge that gap by providing skilled technicians who can handle multiple types of repairs and maintenance needs in a single visit, saving homeowners time and reducing the hassle of coordinating multiple contractors."

The company's approach emphasizes customized solutions tailored to each property's specific requirements. Technicians conduct thorough assessments before recommending repair strategies, ensuring that underlying issues are addressed rather than just surface symptoms. This methodology proves particularly valuable for landlords managing multiple properties and homeowners preparing homes for sale.

Evergreen Construction Home repair services integrate seamlessly with the company's established remodeling capabilities. While continuing to offer full-scale kitchen and bathroom renovations, deck construction, and room additions, the expanded handyman division focuses on preventive maintenance and timely repairs that help preserve property value and prevent costly future damage.

The timing of this service expansion aligns with seasonal maintenance needs as Missouri homeowners prepare properties for winter weather. Common requests include gutter cleaning and repair, weatherstripping installation, exterior caulking, and heating system maintenance checks. The company's technicians also address storm-related repairs, including roof patching, siding replacement, and structural assessments following severe weather events.

Military veterans receive a ten percent discount on all services, reflecting the company's commitment to supporting those who have served. This benefit applies to both major renovation projects and routine handyman services, making professional home maintenance more accessible to veteran homeowners throughout the service area.

The expanded services roll out with trained technicians equipped to handle diverse repair scenarios. Each team member receives ongoing education in current building codes, safety protocols, and emerging repair techniques. The company maintains full licensing, bonding, and insurance coverage, providing customers with protection and peace of mind.

Evergreen Construction has established itself as a trusted resource for residential property improvements throughout Southwest Missouri. Since its founding in 2022, the company has completed projects ranging from complete home renovations to outdoor structure construction, interior and exterior painting, landscaping, and specialized installations. The addition of comprehensive handyman services reinforces its position as a single-source solution for residential property maintenance and improvement needs.
