

RestoPros of Columbus West Achieves IICRC Certified Firm Status

October 15, 2025

COLUMBUS, OH - October 15, 2025 -
RestoPros of Columbus West has achieved certified firm status from the Institute of Inspection Cleaning and Restoration Certification (IICRC), the global certification body that sets standards for the inspection, cleaning, and restoration industries. This certification validates the company's commitment to maintaining the highest industry standards in restoration services across Columbus and surrounding communities.

The IICRC Certified Firm designation requires companies to meet rigorous standards including proper insurance coverage, written customer complaint procedures, ongoing education for technicians, and adherence to the IICRC Code of Ethics. Companies must also maintain at least one IICRC-certified technician on staff and commit to ongoing professional development.

"Achieving IICRC Certified Firm status reflects our dedication to excellence in every restoration project we undertake," said Ramona Kline, a spokesperson from RestoPros of Columbus West. "This certification assures our customers that they are working with professionals who follow industry best practices and

maintain the technical expertise necessary to handle complex restoration challenges, from water damage to fire and smoke remediation."

RestoPros of Columbus West provides 24/7 emergency response for water damage, fire and smoke damage, mold remediation, and storm damage restoration. The company serves Columbus, Dublin, Hilliard, Westerville, Worthington, and surrounding areas with rapid response times and comprehensive restoration solutions.

The IICRC certification process involves extensive documentation review, verification of business practices, and confirmation that the company maintains appropriate insurance and bonding. Certified firms must renew their status annually and demonstrate continued compliance with evolving industry standards.

"Our team understands that property damage emergencies are stressful experiences for home and business owners," added Kline. "This certification reinforces our commitment to providing not just technical expertise, but also the professionalism and ethical standards that customers deserve during challenging times."

The certification particularly enhances the company's capabilities in addressing complex restoration scenarios that require specialized knowledge and equipment. IICRC standards cover everything from proper water extraction techniques to antimicrobial application protocols, ensuring that certified firms can effectively mitigate damage while protecting occupant health and safety.

RestoPros of Columbus West maintains a 4.9 out of 5 rating based on customer reviews, with clients consistently praising the company's professionalism, quality of work, and reasonable pricing. The company works directly with insurance providers to streamline the claims process for property owners.

Founded as a locally-owned restoration company, RestoPros of Columbus West combines over 30 years of industry experience with advanced restoration technology and techniques. The company specializes in residential and commercial restoration services, providing comprehensive solutions that range from initial emergency response through complete property restoration.
