Williams and Sons Custom Construction Expands Services to Include Complete Home Renovation Solutions

October 17, 2025

CASSVILLE, MO - October 17, 2025 -
Williams and Sons Custom Construction and Design, a family-owned custom home builder with over 50 years of experience in Southwest Missouri, has expanded its service offerings to include comprehensive home additions and renovation solutions for existing homeowners throughout the region.

The expansion responds to increasing demand from residents in Monett, Golden, Eagle Rock, Shell Knob, and Cassville who prefer to modify and enhance their current homes rather than relocate. The company, which previously focused primarily on new custom home construction, now provides full-scale renovation services, including kitchen and bathroom remodels, room additions, second-story expansions, and complete home renovations.

The company's approach to renovations mirrors its established custom home building methodology. Williams and Sons Custom Construction Custom Home Builder, maintains a hands-on approach with owners present

on-site to oversee projects and ensure quality standards are met. Each renovation project receives the same attention to detail and commitment to timeline adherence that has defined the company's new construction work for half a century.

"After five decades of building custom homes from the ground up, we recognized that many families in Southwest Missouri want to stay in their neighborhoods while updating their living spaces," said Trevor, a spokesperson from Williams and Sons Custom Construction. "This expansion allows us to serve homeowners at every stage, whether they're building their dream home from scratch or transforming their existing property."

The expansion includes enhanced in-house design capabilities specifically tailored for renovation projects. Williams and Sons Custom Construction Architectural Design services now encompass both new construction blueprints and renovation planning, allowing homeowners to visualize changes before construction begins. This integrated approach eliminates the need for separate design consultants and ensures seamless communication throughout the renovation process.

"Renovations require a different skill set than new construction, particularly when it comes to working within existing structures and preserving the character of a home," added Trevor. "Our team has invested significant time in training and equipment to ensure we deliver the same quality in renovations that our clients expect from our custom builds."

The company's renovation services complement its existing custom home and new construction offerings, providing Southwest Missouri residents with a comprehensive range of residential building solutions. Williams and Sons maintains its commitment to hitting project timelines, maintaining clean job sites, and keeping clients informed throughout the entire renovation process.

Williams and Sons Custom Construction and Design has served Southwest Missouri for over 50 years as a locally operated custom home builder. The company specializes in custom homes, new construction, home additions, and now complete renovation services. Known for their hands-on approach and in-house design services, the company serves communities throughout the region, including Monett, Golden, Eagle Rock, Shell Knob, and Cassville.
