

Rigert Treppenlifte AG Announces Enhanced Stairlift Maintenance Programs Across Kussnacht Service Areas

October 14, 2025

Küssnacht am Rigi, SZ - October 14, 2025 -
Rigert Treppenlifte AG, a leading Swiss provider of mobility solutions since 1962, announces the expansion of its comprehensive maintenance programs for stairlifts and platform lifts throughout its service regions. The company has strengthened its technical service capabilities to better serve the growing number of Swiss residents requiring reliable mobility solutions in their homes.

The enhanced maintenance programs address the increasing demand for professional stairlift servicing as more Swiss households install mobility equipment to support aging in place. With operations spanning German, French, and Italian-speaking regions of Switzerland, Rigert Treppenlifte AG has positioned specialized technicians to provide faster response times and more thorough preventive maintenance services.

The company's maintenance services cover all types of mobility equipment, including straight and curved

stairlifts, platform lifts for wheelchair users, and home elevators. Technicians perform comprehensive inspections, lubrication, adjustments, and component replacements as needed to prevent unexpected breakdowns and extend equipment lifespan. Customers can access service information and scheduling through https://rigert-treppenlifte-kuesnacht.localo.site for convenient appointment booking.

As part of the Garaventa Group, Rigert Treppenlifte AG maintains the industry's largest customer service network in Switzerland. The company's technical teams undergo continuous training on the latest lift technologies and safety protocols. This expertise proves particularly valuable when servicing complex installations in older Swiss homes where narrow staircases and unique architectural features require specialized attention.

The timing of the enhanced maintenance programs aligns with seasonal safety considerations as winter weather conditions can affect outdoor lift installations. Ice, snow, and temperature fluctuations place additional stress on mechanical components, making professional inspections especially important during colder months. Property owners can find their nearest service location at https://maps.app.goo.gl/6tLvBHSTzXphXNuh7 to arrange preventive maintenance before winter conditions arrive.

Beyond residential installations, Rigert Treppenlifte AG services mobility equipment in healthcare facilities, senior living communities, and public buildings throughout Switzerland. The company's comprehensive approach includes emergency repair services, replacement parts inventory management, and modernization consultations for older equipment. Additional service details and technical specifications are available at https://s3.amazonaws.com/slstacks/rigert/id.html for facility managers and property owners.

Rigert Treppenlifte AG specializes in stairlifts, platform lifts, wheelchair lifts, and custom mobility solutions for residential and commercial properties. Since 1962, the company has installed thousands of mobility systems across Switzerland, earning a reputation for quality craftsmanship and reliable service. The company operates service centers throughout German, French, and Italian-speaking regions of Switzerland, providing consultation, installation, and ongoing maintenance services for all types of mobility equipment.
