

Encore Data Products Expands K-6 Classroom Furniture Portfolio with BERPL Brands Addition

October 20, 2025

LAFAYETTE, CO - October 20, 2025 -
Encore Data Products, a leading provider of educational technology and classroom solutions, has expanded its product portfolio to include BERPL's comprehensive line of classroom furniture, headphones, and more. Many products included are designed specifically for kindergarten through K-12 learning environments. The addition brings together the product collections of Learniture, Sprogs, Egghead, and Norwood Commercial Furniture under the Encore Data Products umbrella.

The expansion addresses the growing demand for ergonomic, durable classroom furniture that supports active learning methodologies in elementary schools. BERPL's product lines encompass chairs, stools, desks, mobile carts, tables, and soft seating options, all engineered to meet the unique physical and educational needs of young learners.

?Elementary educators have been seeking furniture solutions that can adapt to different learning styles while maintaining the durability needed for daily classroom use,? said a representative at Encore Data Products.

?The BERPL brands bring decades of experience in creating furniture that promotes healthy posture and movement, which research shows is crucial for young students' physical development and academic engagement.?

The furniture collections feature colorfast finishes designed to withstand frequent cleaning, addressing heightened hygiene requirements in educational settings. Each piece undergoes rigorous testing to meet or exceed industry standards and carries appropriate certifications for school use. The ergonomic designs support proper posture development during critical growth years while allowing for the flexibility modern classrooms require.

Beyond traditional seating and desk options, the BERPL product lines include specialized items such as mobile carts for books and technology devices, accommodating the increasing integration of tablets and laptops in elementary education. Soft seating options, including bean bag chairs, provide alternative learning spaces that support different teaching methods and student comfort preferences.

The addition complements Encore Data Products' existing technology offerings, creating comprehensive classroom solutions. Schools can now source both their audio-visual technology needs and furniture requirements through a single vendor, streamlining procurement processes and ensuring compatibility between technology infrastructure and classroom furnishings.

Educators interested in exploring the BERPL furniture collections can access the complete catalog at https://www.encoredataproducts.com/berpl/ where detailed specifications and configuration options are available for each product line.

Based in Lafayette, Colorado, Encore Data Products has served educational institutions nationwide for over two decades, specializing in audio technology, AV equipment, and classroom solutions. The company provides headphones, charging stations, document cameras, PA systems, and various educational technology accessories to schools, libraries, and businesses. With the addition of BERPL's furniture brands, Encore Data Products continues its mission to create comprehensive learning environments that support student success through thoughtfully designed products that merge functionality with durability.
