

Windows of Wisconsin Nears Three Decades of Helping Homeowners Transform Their Properties

October 24, 2025

KAUKAUNA, WI - October 24, 2025 -
Windows of Wisconsin marks a significant milestone as the family-owned business approaches its third decade of providing window and door replacement services to Wisconsin residents. The company, which has operated for 27 years, continues to expand its impact on energy efficiency and home aesthetics throughout the state.

?Reaching nearly three decades in business reflects our commitment to quality craftsmanship and customer satisfaction,? said Tyler from Windows of Wisconsin. ?Every project we undertake focuses on helping homeowners achieve their goals of improved energy efficiency, enhanced curb appeal, and increased home comfort.?

Founded as a family enterprise, the Kaukauna-based company has established itself as a provider of replacement windows and patio doors across Wisconsin. The approaching 30-year mark represents thousands of homes transformed through professional window and door installations, contributing to both

energy conservation and property value enhancement throughout the region.

The company specializes in a comprehensive range of window styles, including awning, bay, bow, casement, double hung, round top, slider, and special shape windows. Each installation utilizes Infinity from Marvin products, featuring Ultrex fiberglass construction that combines the aesthetic appeal of traditional wood with modern durability and minimal maintenance requirements.

Beyond standard window replacements, the company offers various patio door options, including bi-fold, sliding patio, sliding French, and inswing French doors. These installations create seamless transitions between indoor and outdoor living spaces while maintaining energy efficiency standards.

The longevity of Windows of Wisconsin in the home improvement industry stems from its focus on combining quality products with professional installation services. The company's use of fiberglass materials provides homeowners with windows that resist warping, cracking, and deterioration common in other materials, ensuring long-term performance in Wisconsin's variable climate conditions.

?Our approach has always centered on understanding each homeowner's unique needs and providing solutions that deliver lasting value,? added Tyler. ?As we near this 30-year milestone, we remain dedicated to helping Wisconsin families create more comfortable, efficient, and beautiful living spaces.?

The company maintains extensive resources for homeowners, including detailed warranty information, maintenance guidelines, and educational materials about window and door selection. This commitment to customer education has helped establish long-term relationships with clients throughout the state.

As part of its service offerings, the company provides financing options to make window and door replacements accessible to more homeowners. The referral program further demonstrates the company's confidence in its work, rewarding satisfied customers who recommend services to others.

Windows of Wisconsin operates from its Kaukauna facility, serving communities throughout the state. The family-owned structure has allowed the company to maintain consistent quality standards and personalized service throughout its nearly three decades of operation. The business continues to adapt to evolving energy efficiency standards and homeowner preferences while maintaining its core commitment to quality installation and customer satisfaction.
