

New Dog Jerky Treat Line Developed to Help Cure Ailing Dog

March 01, 2016

March 01, 2016 - PRESSADVANTAGE -

Savvy Pet Products, makers of Simba's Choice USA sourced and made grain free, gluten free, no corn, wheat or soy, beef and chicken dog jerky treats was founded to help cure family's ailing prize Shar-pei from nagging allergies, skin and digestive problems.

"Our beloved Simba began suffering from skin problems, poor digestion, no energy and seemed depressed," says Aisulu Gates, Co-Founder of Savvy Pet Products. "We were mortified. Trip after trip to our vet and lots of testing later, we still didn't know the causes. Nobody could give us clear answers as to why and how we could cure my baby boy Simba. However, I became determined to get my beloved Simba back to his happy and healthy self."

"I started to research dog wellbeing on my own and discovered that most of our furry babies have a long list of problems due to their diet: allergies, skin problems, digestive problems, cancer, and the list went on and on," says Gates. "We spent hundreds of hours researching pet nutrition and the pet product industry. I immediately put Simba on a grain free and gluten free diet in both his everyday food and treats. The challenge was that Simba did not like any of his treats so after a lot of research, we made our own,

Simba's Choice dog jerky treats.?

Simba's Choice beef and chicken dog jerky treats are 100% sourced and made in the USA in an FDA approved facility in small batches to guarantee freshness. Each 7" savory rolled stick is filled with premium meat, never any filler or artificial preservatives of any kind. Simba's Choice is grain free, gluten free and contains no corn, wheat or soy, which may be harmful to dogs.

?Dog owners are demanding that manufacturers be completely transparent with where their ingredients are being sourced,? reports Aisulu Gates. ?Third party suppliers who may supply USA-based businesses do not have to report the origin of every ingredient in any formulation being sourced. In addition, if a certain ingredient is in short supply and is replaced with another, there is no disclosure required. This can result in unknown foreign ingredients being in your pet's food without you knowing about it. Based on our research, we compiled a dog health alert for the 20 foods not to feed your dog.?

About Savvy Pet Products

Savvy Pet Products manufacturers all natural USA sourced and made pet treats and other goodies and gear for savvy pet owners. Click here for more information.
