Palmetto Kids General Dentistry and Orthodontics Emphasizes Comprehensive Pediatric Dental Care

October 23, 2025

October 23, 2025 -

Palmetto Kids General Dentistry and Orthodontics in Charleston, SC continues to provide specialized pediatric dental services designed to create positive dental experiences for children throughout the Lowcountry region. The practice, led by Dr. Kimberly Duffey, combines advanced dental technology with a child-centered approach to address the unique oral health needs of young patients.

The Summerville-based practice has established itself as a provider of comprehensive pediatric dental care, offering services ranging from routine cleanings to orthodontic treatments and advanced laser dentistry procedures. With a focus on creating anxiety-free visits, the practice serves families seeking specialized dental care tailored specifically for children.

"Creating a positive dental experience during childhood establishes the foundation for lifelong oral health," said Dr. Kimberly Duffey, lead dentist at the practice. "Our approach combines gentle care with advanced techniques to ensure children feel comfortable and confident during their dental visits. We understand that

each child has unique needs, and we adapt our methods accordingly to provide the most effective and comfortable treatment possible."

The practice offers a comprehensive range of services including orthodontic care for teeth and jaw alignment, soft tissue laser treatments that often eliminate the need for sutures, and sedation options for children who experience dental anxiety. The facility also provides restorative dentistry services such as dental sealants, fillings, crowns, and space maintainers for children who lose baby teeth prematurely.

Recent patient feedback highlights the practice's success in creating a welcoming environment for young patients. The facility maintains extended hours on select days to accommodate busy family schedules, including early morning appointments starting at 7 AM on Fridays and evening hours until 6 PM on Mondays.

The practice's commitment to preventive care includes offering complimentary screenings for new patients under two years old, emphasizing the importance of early dental health assessment. Additionally, the practice provides custom sports guards to protect young athletes' teeth during recreational activities.

For children requiring more extensive procedures, the practice offers outpatient surgery options at Trident Surgery Center, ensuring continuity of care with familiar providers in a specialized setting. The availability of various sedation options, from nitrous oxide to conscious sedation, allows the dental team to accommodate children with different comfort levels and medical needs.

Located in SC, the dental clinic serves families throughout the Charleston metropolitan area and surrounding communities. The facility features modern dental equipment and a design specifically created to appeal to young patients, helping to reduce anxiety commonly associated with dental visits.

Palmetto Kids General Dentistry and Orthodontics operates as a specialized pediatric dental practice dedicated to providing comprehensive oral health services for children from infancy through adolescence. The practice combines traditional dental care with advanced treatment options, maintaining a focus on patient comfort and positive experiences that encourage lifelong dental health habits.
