

## **DUSAW Expands Smart Hotel Locks Portfolio with Prestigious Army and Navy Club Installation**

*October 27, 2025*

Lakewood Township, New Jersey - October 27, 2025 - PRESSADVANTAGE -

DUSAW, a provider of smart lock technology for commercial properties, has secured a significant contract to install its advanced access control systems at The Army and Navy Club in Washington, DC. The installation at this historic Five-Star Platinum Club represents a notable expansion of the company's presence in prestigious hospitality venues.

The Army and Navy Club, located in Farragut Square, has served as a gathering place for distinguished military and political leaders for generations. The selection of DUSAW smart lock technology for this landmark property demonstrates the company's ability to deliver security solutions that meet the exacting standards of elite establishments while preserving their traditional character.

"Securing The Army and Navy Club represents more than just another installation for our team," said Ben Eidlitz, COO of DUSAW. "This project showcases our capability to implement modern access control in historic buildings where security must blend seamlessly with tradition. Our technology provides the perfect

balance between maintaining the club's distinguished atmosphere and delivering the convenience and security that today's members expect."

The Army and Navy Club installation adds to DUSAW's growing portfolio of prestigious hospitality projects, which includes work with Parker New York, Resorts World Catskills, Four Points LAX, Cavalier Hotel, and Hilton Norfolk THE MAIN. These installations demonstrate the versatility of the company's hardware and software solutions, which can be adapted to meet the unique requirements of each property.

Since 2014, DUSAW has specialized in providing comprehensive smart lock solutions for various commercial sectors, including multifamily residences, offices, hotels, and healthcare facilities. The company's Hotel Door Locks systems offer multiple access options including RFID cards, passcodes, and E-keys, while providing property managers with remote monitoring capabilities and detailed access logs.

"What sets our approach apart is our understanding that every property has its own character and security requirements," added Eidlisz. "Whether we're working with a cutting-edge development or a building with decades of history, we ensure our access control solutions enhance both security and the user experience without compromising the property's unique identity."

The company's smart lock systems feature API integration capabilities that allow seamless connection with existing Property Management Systems. This flexibility has made DUSAW a trusted partner for thousands of hosts worldwide, providing them with tools to manage access permissions, create scheduled entry for staff and visitors, and maintain comprehensive security logs.

DUSAW continues to expand its presence in the hospitality sector by offering solutions that address the evolving security needs of modern hotels while maintaining the elegance and sophistication that guests expect from premium establishments. The company's commitment to innovation includes developing advanced features such as fingerprint encoder technology and tamper-proof access control panels.

Founded in 2014, DUSAW specializes in smart lock technology for commercial properties. The company provides hardware, software, and integration services for multifamily buildings, offices, hotels, and healthcare facilities, with installations in properties throughout the United States and internationally.
