

Keathley Landscaping Expands Cedar Fencing and Drainage Solutions to Meet Growing Demand

November 03, 2025

GARLAND, TX - November 03, 2025 -
Keathley Landscaping announces the expansion of its cedar fencing installation and yard drainage services throughout the Dallas metropolitan area, responding to increased homeowner demand for comprehensive outdoor solutions that address both aesthetic and functional landscape needs.

The Dallas-based landscape company has enhanced its service capabilities to provide integrated solutions that combine custom cedar fencing with advanced drainage systems, addressing two of the most common challenges faced by North Texas property owners. The expansion comes as more homeowners seek single-source contractors capable of handling multiple aspects of outdoor improvement projects.

"Property owners throughout the region are dealing with increasingly complex drainage issues while also wanting to enhance their outdoor spaces with quality fencing," said Logan Keathley, NDS Certified Drainage Contractor and owner of Keathley Landscaping. "By expanding our cedar fencing and drainage services, we can now provide comprehensive solutions that protect properties from water damage while creating beautiful,

functional outdoor environments."

The company's drainage expertise addresses the persistent flooding and water management challenges common in Texas properties, where clay soil and unpredictable weather patterns create unique drainage complications. As a certified drainage contractor, the company employs various techniques, including French drain installation, yard grading, and custom-designed buried drainage pipe systems to resolve water accumulation issues.

Cedar fencing remains a preferred choice for Texas homeowners due to the material's natural resistance to decay and insects, minimal maintenance requirements, and status as a renewable resource. The expanded fencing services include custom design consultation, professional installation, and comprehensive fence repair options for existing structures.

Beyond its role as an Allen fence company, Keathley Landscaping continues to offer comprehensive outdoor services, including professional stonework installations. These additional capabilities allow property owners to coordinate multiple improvement projects through a single contractor, streamlining the renovation process and ensuring consistent quality across all installations.

The expansion reflects broader trends in residential landscaping where homeowners increasingly view outdoor spaces as extensions of their living areas. The combination of proper drainage infrastructure with quality fencing creates foundations for more elaborate outdoor improvements, including patios, outdoor kitchens, and entertainment areas.

"Texas homeowners understand that proper drainage is essential for protecting their landscape investments," added Keathley. "When drainage problems are resolved and quality fencing is installed, property owners gain peace of mind knowing their outdoor spaces are both beautiful and built to withstand our challenging climate conditions."

The company's integrated approach addresses the full spectrum of landscape challenges, from managing water flow and preventing erosion to creating defined outdoor spaces with custom fencing solutions. This comprehensive service model eliminates the need for homeowners to coordinate multiple contractors for related projects.

Keathley Landscaping has served the Dallas metropolitan area since 2002, establishing a reputation for solving complex landscape challenges through practical, cost-effective solutions. The company specializes in cedar fencing, drainage solutions, natural and modern stonework, retaining walls and veneers, outdoor living

spaces, flowerbed borders, and more. Keathley Landscaping provides services throughout Dallas, Allen, Plano, Richardson, Frisco, McKinney, and surrounding North Texas communities.
