

DuMo Informatik & Scanning AG Highlights Comprehensive Document Digitization Services

October 21, 2025

SPREITENBACH, CH - October 21, 2025 -
DuMo Informatik & Scanning AG, a leading Swiss provider of secure document digitization and archiving solutions, continues to address the growing demand for professional scanning services as businesses across Switzerland seek to modernize their document management systems and improve operational efficiency.

Based in Spreitenbach, Switzerland, the ISO 27001:2013 certified company has established itself as a trusted partner for organizations requiring secure, high-quality digitization of physical documents, plans, books, and archives. Since 1989, DuMo Informatik & Scanning AG has developed specialized expertise in converting paper-based systems into searchable digital formats while maintaining the highest standards of data security and processing quality. Their location details are available at https://maps.app.goo.gl/pgc1YJ7Awg6vzcFJ9.

The company's comprehensive document digitization services encompass scanning of various materials including legal files, construction plans, historical archives, mail entries, and tax returns. Through their Swiss

Scan Centers and mobile scanning capabilities, DuMo Informatik & Scanning AG provides flexible solutions that can be implemented either at their secure facilities or directly at client locations, ensuring minimal disruption to daily operations.

A key differentiator for the company is its in-house software development capability, which enables the creation of customized digitization solutions tailored to specific industry requirements. The company's software portfolio includes DuMo Doc for document management, DuMo Inhouse for organizations preferring to handle scanning internally, Court File Viewer for legal applications, and DuMo Archive for long-term digital preservation. These proprietary solutions integrate seamlessly with the digitization process, providing clients with comprehensive tools for viewing, editing, and securing their digital files.

The importance of professional digitization services has become increasingly evident as Swiss businesses, public institutions, law firms, and financial companies recognize the benefits of digital transformation. Organizations implementing professional digitization report improved document accessibility, reduced physical storage requirements, enhanced collaboration capabilities, and stronger compliance with data protection regulations. The transition from paper-based to digital systems also supports environmental sustainability initiatives by significantly reducing paper consumption and physical storage space.

DuMo Informatik & Scanning AG's ISO 27001:2013 certification demonstrates its commitment to maintaining robust information security management systems. This certification provides clients with assurance that their sensitive documents are handled according to international security standards throughout the entire digitization process. The company's proven quality management system ensures consistent, high-level processing quality across all projects, from small-scale document conversions to large-scale archive digitization initiatives.

The company also provides comprehensive project support to guide organizations through their digital transformation journey. Their approach involves analyzing each client's current document management situation and implementing digitization strategies that align with specific business objectives and regulatory requirements. This consultative approach ensures that digitization projects deliver measurable improvements in efficiency and document accessibility.

DuMo Informatik & Scanning AG operates from its headquarters in Spreitenbach, Switzerland, serving clients throughout the region. The company maintains a strong reputation in the Swiss market, reflected in positive client feedback praising their professional advice, quick turnaround times, and service-oriented approach.
