Modern Shuttle Transportation Expands Operations to North Carolina with Enhanced Fleet Services

October 23, 2025

October 23, 2025 -

Modern Shuttle Transportation, a veteran-owned transportation company founded in 2018, has expanded its operations beyond its Southern California base to establish a second location in New Bern, North Carolina. The expansion enables the company to provide comprehensive group transportation services across both states with an upgraded fleet designed to accommodate diverse client needs.

The Riverside, California-based company has enhanced its service offerings to include specialized transportation solutions for corporate events, airport transfers, weddings, and private city tours. The expanded fleet features transit vehicles and motorcoaches equipped with WiFi connectivity, climate control systems, and plush seating configurations that can accommodate groups ranging from three to 56 passengers.

"Our expansion into North Carolina represents a significant milestone in our commitment to providing reliable transportation services to a broader client base," said the Chief Executive Officer of Modern Shuttle

Transportation. "Since our founding six years ago, we have focused on understanding the unique logistics requirements of each client, whether they need airport transfers for flight crews, transportation for corporate events, or shuttle services for wedding parties."

The company's growth strategy addresses the increasing demand for professional group transportation services that prioritize both comfort and operational efficiency. Modern Shuttle Transportation handles comprehensive logistics planning, including route optimization, scheduling coordination, and vehicle selection based on group size and specific requirements.

The enhanced fleet includes three vehicle categories designed to serve different group sizes and transportation needs. The Transit Connect accommodates three passengers with luggage capacity for six pieces, while the Transit Van serves groups of up to 10 passengers with space for 12 pieces of luggage. For larger groups, the company's motorcoach provides seating for up to 56 passengers, making it suitable for corporate gatherings, large wedding parties, and group tours.

Beyond standard transportation services, the company has developed specialized programs for specific client segments. Flight crews receive dedicated shuttle services between airports, hotels, and other destinations, while corporate clients benefit from customized transportation packages that align with their event schedules and participant needs. The Bus Charter Service division focuses on providing comprehensive solutions for organizations requiring regular or event-based group transportation.

"The transportation industry has evolved significantly, and clients now expect more than just point-to-point transfers," added Robinson. "They want partners who understand their scheduling complexities, provide real-time communication, and deliver consistent service quality across multiple locations. Our bi-coastal presence allows us to meet these expectations while maintaining the personalized approach that has defined our company since inception."

The North Carolina location strategically positions the company to serve the eastern United States while maintaining its strong presence in Southern California. This geographic diversification enables Modern Shuttle Transportation to support clients with multi-state transportation needs and provide seamless service coordination across both regions.

Modern Shuttle Transportation specializes in providing premium group transportation services for corporate events, airports, weddings, and private tours. Founded in 2018 as a veteran-owned business, the company operates from headquarters in Riverside, California, and New Bern, North Carolina, offering a comprehensive fleet of vehicles equipped with modern amenities to serve groups of all sizes.
