Boise Bathtub Refinishing Expands Services to Meet Growing Demand for Bathroom Restoration

October 22, 2025

BOISE, ID - October 22, 2025 -
Boise Bathtub Refinishing, a bathroom restoration specialist serving the Treasure Valley since 2002, has expanded its service offerings to address increasing demand for cost-effective bathroom renovation solutions across residential and commercial properties in Idaho.

The company now provides comprehensive refinishing services for bathtubs, showers, tiles, and countertops, along with specialized repair services for fiberglass, porcelain, and ceramic surfaces. This expansion comes as property owners throughout Boise, Meridian, Nampa, Caldwell, and surrounding communities seek alternatives to costly full bathroom replacements.

"The demand for bathroom refinishing has grown significantly as property owners discover they can achieve dramatic transformations at a fraction of the replacement cost," said Matt Knudson, founder of Boise Bathtub Refinishing. "We've expanded our capabilities to handle everything from minor chip repairs to complete surface restoration, allowing us to serve a broader range of clients including homeowners, property managers, and real estate professionals."

The refinishing process addresses common bathroom surface issues including cracks, leaks, chips, stains, rust, and general wear. Unlike traditional replacement methods that can take weeks and require extensive demolition, the company's refinishing services typically complete transformations within a single day. This efficiency has made the service particularly attractive to property managers handling rental turnovers and realtors preparing homes for sale.

Knudson, who previously worked as a realtor before founding the company, recognized the need for affordable bathroom renovation options among rental property owners, baby boomers downsizing their homes, and sellers preparing properties for market. His background in real estate provided unique insights into the challenges property owners face when dealing with outdated or damaged bathroom surfaces.

The company's technicians work with various surface materials including porcelain bathtubs and showers,

fiberglass shower pans and surrounds, ceramic tile walls and floors, and Formica and tile counters. Each refinishing project includes surface preparation, repair of existing damage, and application of specialized coatings designed to provide long-lasting durability.

Recent customer feedback has highlighted the quality of workmanship and professionalism demonstrated by the company's technicians. Boise Bathtub Refinishing Reviews consistently mention the attention to detail and courtesy shown during service appointments, with many customers noting the dramatic improvement achieved in their bathroom spaces.

"Our commitment extends beyond just refinishing surfaces," added Knudson. "We focus on delivering expert craftsmanship with transparent, upfront pricing so customers know exactly what to expect before work begins."

The company serves both commercial and residential clients throughout the Treasure Valley, including Eagle, Kuna, Middleton, and Star. Services range from single bathtub refinishing projects to comprehensive bathroom surface restoration for apartment complexes and commercial properties.

Boise Bathtub Refinishing operates as a full-service bathroom restoration company specializing in surface refinishing and repair. Founded in 2002, the company has established itself as a regional leader in bathroom surface restoration, offering alternatives to costly replacement projects while maintaining high standards of quality and customer service.
