

Austin Windshields Expands Mobile Service Fleet for Same-Day Auto Glass Repairs

October 27, 2025

AUSTIN, TX - October 27, 2025 -
Austin Windshields, a mobile auto glass repair and replacement company serving the Greater Austin Area, has expanded its mobile service capabilities to address increasing demand for convenient, same-day windshield repairs and replacements throughout the metro area.

The expansion enables the company to bring professional auto glass services directly to customers at their homes, offices, or any location throughout Austin and surrounding communities including Lakeway, Cedar Park, Round Rock, and Georgetown. With over 30 years of experience in the industry, the company's certified technicians now operate an enhanced fleet of mobile units equipped to handle everything from minor chip repairs to complete windshield replacements and ADAS recalibration services.

"The demand for mobile auto glass services has grown significantly as more drivers recognize the convenience and time savings of having repairs completed at their location," said Jas Hudson, Owner of Austin Windshields. "Our expanded mobile fleet allows us to respond faster to service requests while

maintaining the high-quality workmanship our customers expect. We can now reach more customers throughout the metro area with same-day service, eliminating the need for them to drive with damaged glass or take time off work for repairs."

The mobile service expansion comes as the company continues to see increased requests for Austin Windshields auto glass repair services, particularly from customers seeking alternatives to traditional shop-based repairs. Each mobile unit carries OEM-quality parts and professional-grade equipment, enabling technicians to perform the same comprehensive services available at traditional repair facilities.

Beyond standard windshield repair and replacement, the company's mobile units are equipped to handle specialized services, including ADAS (Advanced Driver Assistance Systems) recalibration, side door glass replacement, and back glass replacement. The ADAS recalibration service has become increasingly important as more vehicles incorporate advanced safety features that require precise calibration after windshield replacement.

The company uses specialized resin technology for repairable chips and cracks, which seals damage, strengthens the glass, and prevents cracks from spreading. This approach often allows customers to avoid full windshield replacement when damage is caught early, providing both cost savings and environmental benefits through reduced glass waste.

Mobile service appointments include free damage assessment and quotes, with technicians able to determine on-site whether repair or replacement is necessary. The service eliminates common barriers to auto glass repair, such as transportation challenges and scheduling conflicts, making it easier for drivers to address windshield damage promptly.

Austin Windshields specializes in comprehensive auto glass services for all vehicle makes and models. The company maintains a team of certified technicians who undergo continuous training on the latest repair techniques and safety protocols. With three decades of experience serving the Austin metropolitan area, the company has established itself as a trusted provider of mobile auto glass repair and replacement services, offering free quotes and same-day service availability throughout the Greater Austin region.
