Studio Trio Hair Salon Announces Expansion of Green Circle Certified Services Across Long Island

October 23, 2025

LINDENHURST, NY - October 23, 2025 -
Studio Trio Hair Salon announced today the expansion of its Green Circle Certified sustainable hair care services to meet growing demand from clients throughout Long Island, marking twelve years of operation as the region's first salon to achieve this environmental certification.

"The expansion of our sustainable practices reflects the growing awareness among Long Island residents about the environmental impact of the beauty industry," said Naomi Corbo, Owner of Studio Trio Hair Salon. "We've seen a significant increase in clients traveling from across the region specifically for our Green Circle Certified services, which has prompted us to enhance our offerings while maintaining our environmental standards. Clients can now visit Studio Trio Hair Salon to book an appointment for services ranging from standard cuts to comprehensive bridal styling packages."

The Lindenhurst-based salon has implemented new scalp therapy treatments incorporating red and blue light technology alongside its existing service menu, which includes precision haircuts, dimensional color services, and specialized treatment programs. The expansion responds to increased client traffic from Nassau and Suffolk counties seeking salons that recycle and repurpose up to ninety-five percent of waste materials.

The salon's new specialized treatment programs include custom hair treatments starting at eighteen dollars and four-week treatment packages designed for specific hair and scalp concerns priced at two hundred fifty dollars. The recently introduced scalp therapy sessions utilize light therapy technology, with pricing determined through consultation. These additions complement the salon's existing services, which have generated more than two hundred fifty client reviews.

The facility maintains an active social media presence where clients can follow Studio Trio for updates on new services and sustainability initiatives, with current engagement including more than one thousand three hundred likes and one thousand four hundred followers on Facebook. The salon has expanded its operating hours to accommodate increased demand, opening at six in the morning on weekdays and offering weekend appointments.

Studio Trio Hair Salon's Green Circle Certification enables the facility to divert beauty waste from landfills and waterways through specialized recycling programs. Hair clippings are repurposed for oil spill cleanup and composting, while chemical waste undergoes proper treatment rather than entering water systems. Metal materials from color tubes and foils are separated and recycled through designated programs.

The salon's retail shop provides professional hair care products, allowing clients to maintain salon results at home while supporting sustainable beauty practices. For those seeking the salon's location, clients can find Studio Trio Hair Salon here at 109 North Wellwood Avenue in Lindenhurst, positioned near the Long Island Rail Road station for accessibility from surrounding communities.

Studio Trio Hair Salon operates as a full-service salon specializing in sustainable beauty practices. Founded twelve years ago, the salon became Long Island's first Green Circle Certified facility and continues to develop environmentally responsible service options while serving clients from across Nassau and Suffolk counties. The salon focuses on combining professional hair care services with environmental stewardship through waste diversion programs and sustainable product offerings.
