

daylight AG Enhances Educational Software Solutions for Swiss Schools and Training Institutions

October 23, 2025

Winterthur, ZH - October 23, 2025 -
daylight AG, a leading Swiss software company specializing in school administration, course management, examination processing, event coordination, and accounting systems, continues to strengthen its position as a comprehensive technology partner for educational institutions throughout Switzerland. The Winterthur-based company has refined its integrated software platform to address the evolving digital transformation needs of schools, training centers, and educational organizations seeking more efficient administrative solutions.

The company's modular software system combines multiple administrative functions into a single, unified platform that enables educational institutions to streamline their operations while maintaining complete data control and security. This integrated approach allows schools and training providers to manage student records, course scheduling, examination processes, event coordination, and financial accounting through one centralized system, significantly reducing administrative overhead and improving operational efficiency. Additional information about daylight AG can be found at https://daylight-ag.localo.site/.

Educational institutions face increasing pressure to modernize their administrative processes while maintaining focus on their core mission of student education and development. daylight AG's software platform addresses these challenges by providing Swiss educational organizations with tools that automate routine tasks, improve data accuracy, and free up valuable resources that can be redirected toward enhancing educational outcomes.

The software platform developed by daylight AG incorporates advanced features for people and address management, registration processing, resource allocation, and customer relationship management. These capabilities are particularly valuable for institutions managing complex course catalogs, multiple training programs, and diverse student populations. The system also supports the creation of online portals and e-commerce functionality, enabling educational providers to offer digital registration, automated confirmation processes, and integrated payment systems. Swiss educational institutions benefit from daylight AG's commitment to local development and support. The company's solutions are designed specifically for the Swiss educational market, ensuring compliance with local regulations and standards while offering both cloud-based and on-premises deployment options. This flexibility allows institutions to choose implementation models that best fit their existing IT infrastructure and security requirements.

The platform's integration capabilities enable seamless connectivity with existing financial applications and other enterprise systems commonly used by educational institutions. This interoperability ensures that schools can maintain their current technology investments while benefiting from daylight AG's specialized educational management features. Recent updates have focused on enhancing user experience, improving system performance, and expanding automation capabilities across all modules.

Based at Bahnhofplatz 12 in Winterthur, daylight AG has established itself as a trusted technology partner for Swiss educational institutions over more than two decades of operation. The company's software solutions serve a diverse range of educational organizations, from small training providers to large academic institutions, supporting their digital transformation initiatives and helping them adapt to changing educational delivery models.
