Promeza MG Expands Speaking Engagements Following Success of NDE Book by Critical Care Nurse

October 27, 2025

VALENCIA, CA - October 27, 2025 -
Promeza MG announces expanded speaking opportunities for author and registered nurse Raul Meza following the continued success of his book "Injection of Faith," which documents real-life stories from his 32 years of critical care experience, including accounts of Near Death Experience Stories from intensive care unit patients.

The book, which draws from three decades of medical experience in hospital intensive care units, has generated increased interest from both medical and faith-based communities across the United States and internationally. Meza now receives regular invitations to speak at nursing conferences and churches throughout the country, with recent speaking tours extending to Mexico and Argentina.

"Injection of Faith" presents documented accounts from the intensive care unit, where patients have shared their NDE's and other remarkable experiences during critical medical moments. The collection represents observations and patient testimonies gathered during Meza's extensive career as a critical care nurse, offering readers insights into the extraordinary events that can occur during life-threatening medical situations.

"The response to these real-life accounts has been overwhelming," said Betty Meza, representative for Promeza MG. "Medical professionals appreciate the clinical perspective combined with the human element, while faith communities find inspiration in the miraculous recoveries and spiritual experiences shared by patients. The book bridges the gap between medical science and matters of faith in a unique way."

The expanded speaking engagements reflect growing interest in the intersection of medical care and spiritual experiences. Nursing conferences have incorporated Meza's presentations as part of professional development programs, addressing both the clinical and emotional aspects of critical care nursing. Churches and faith-based organizations have welcomed his message as it provides documented accounts that

resonate with their communities.

To accommodate diverse audiences, Promeza MG offers both English and Spanish versions of the book. The Spanish edition, titled "Inyección de Fe," has enabled Meza to connect with Spanish-speaking communities throughout the Americas. His bilingual capabilities have proven valuable as speaking invitations continue to arrive from various international locations.

The book's impact extends beyond traditional publishing metrics. Healthcare professionals have noted its value in understanding patient experiences during critical medical events, while individuals facing health challenges have found comfort and hope in the documented stories of recovery and transformation.

Promeza MG, through its publishing division Promeza Publishing, specializes in works that address the intersection of healthcare, faith, and human experience. The company focuses on bringing authentic stories from medical professionals to wider audiences, particularly those that offer hope and inspiration during challenging times. The success of "Injection of Faith" by Raul Meza represents the company's commitment to sharing meaningful narratives that resonate across professional and personal boundaries.
