

# Cowtown Segway Tours Unveils New Website for Planning Fort Worth Segway Adventures

*October 23, 2025*

FORT WORTH, TX - October 23, 2025 -
Cowtown Segway Tours, a provider of guided Segway experiences in North Texas, has announced the launch of its newly redesigned website. The updated site reflects the company?s ongoing commitment to improving customer accessibility, streamlining tour booking, and showcasing the unique tour opportunities.

The new digital platform was developed to meet the growing demand from both local residents and visitors who seek an effortless way to plan guided excursions through downtown Fort Worth and beyond. The updated website features a cleaner interface, faster navigation, and more detailed information about each tour option. According to company representatives, the goal of the redesign was to make booking and learning about Segway tours in Texas more straightforward, whether guests are visiting from nearby cities or traveling from across the country.

Tim Ballard, owner of Cowtown Segway Tours in Fort Worth, Texas, emphasized that the website redesign aligns with the company?s mission to create sightseeing adventures for all skill levels. ?Our tours have

always been about exploring Fort Worth,? Ballard said. ?With the updated website, visitors can now find the perfect tour, understand what to expect, and reserve their spot within minutes.?

Ballard added that the timing of the website?s launch coincides with the fall season in North Texas?a period when outdoor exploration peaks due to comfortable weather and scenic downtown views.

The website highlights the variety of guided tours available, including routes that take riders through Sundance Square, the Fort Worth Water Gardens, the Cultural District, and other local landmarks that define the city?s rich history and character. Each route description provides detailed insights about what guests can expect to see, safety guidelines, and the duration of each experience. This improved structure allows guests to make informed decisions about their preferred adventure before arriving on-site.

In addition to the enhanced layout, Cowtown Segway Tours? new website now integrates mobile optimization for a seamless experience on any device. The upgrade ensures that visitors can browse, schedule, and pay for tours directly from their smartphones or tablets without encountering delays or technical barriers. Ballard noted that accessibility was a top priority during development. ?Many of our guests plan their activities while they?re already on the move,? he explained. ?We wanted a site that could match that level of convenience, so they can plan their Fort Worth Segway adventure while sitting in a café, walking through the Stockyards, or even right after they land at the airport.?

The launch of the updated digital platform also reflects the company?s long-standing commitment to sustainability and community engagement. Unlike conventional bus or car tours, Segway tours produce zero emissions, offering an eco-friendly way to experience urban exploration. Ballard stated that the company?s growth has always been rooted in Fort Worth?s dedication to innovation and environmental responsibility. ?Riding through the city on a Segway allows people to see the beauty of Fort Worth without leaving a carbon footprint,? Ballard said. ?The new site is a way for us to share our message with people.?

Cowtown Segway Tours? website also features improved customer support functions, allowing guests to quickly contact staff for private events, corporate group bookings, and special requests. This enhancement is expected to make the booking process more efficient, particularly for large groups and local organizations planning fall activities. The company?s representatives emphasized that personalized service remains a defining feature of their operations, even as technology takes a more prominent role in their customer interactions.

Another key aspect of the redesign is the integration of clearer visual content. High-quality photography and detailed descriptions give prospective riders a vivid preview of the Segway Adventures offered. This visual approach reflects the company?s goal to inspire visitors to engage with Fort Worth?s urban spaces in a way that is interactive, educational, and entertaining.

For long-time residents, the tours continue to serve as a reminder of how much Fort Worth has evolved while retaining its historic charm. For newcomers, the updated website provides an accessible entry point to discovering the city?s most iconic locations from a unique vantage point. ?Our city is known for its hospitality and culture,? Ballard said. ?This new site allows us to extend that same experience online.?

The timing of this launch also underscores the company?s preparation for the upcoming holiday season, a period when tourism in Fort Worth typically rises due to special events, family gatherings, and seasonal attractions. Cowtown Segway Tours expects its improved online interface to make it easier for visitors to schedule tours in advance, helping them secure reservations during peak weekends and holidays.

With decades of combined experience guiding Texas Segway Tours, the Cowtown team continues to uphold its reputation for safety and local expertise. The updated website features new information on training, safety equipment, and tour etiquette to ensure guests of all ages feel confident before embarking on their ride. Ballard reiterated that safety and education are integral to the experience. ?We?ve always believed that a great tour starts with great preparation,? he said. ?The new site helps guests know what to expect before they even arrive.?

As Cowtown Segway Tours enters this new digital phase, the company looks forward to strengthening its connection with the community and visitors alike. The team sees the redesigned site as not only a practical tool for bookings but also a digital showcase for the vibrant experiences that make Fort Worth an exciting destination. The company plans to continue refining the site based on visitor feedback, ensuring that every guest?whether a first-time rider or returning enthusiast?finds it simple to plan their next adventure.
