Aesthetic Plastic Surgery & Laser Center Reinforces Commitment to Natural Beauty and Patient Safety Standards

October 24, 2025

FARMINGTON HILLS, MI - October 24, 2025 -
Aesthetic Plastic Surgery & Laser Center, under the leadership of Michelle Hardaway M.D., reinforces its foundational commitment to achieving natural-looking results while maintaining the highest standards of patient safety in cosmetic procedures. The Michigan-based practice emphasizes its patient-first philosophy as a distinguishing approach in the field of aesthetic medicine.

The center's approach prioritizes individualized treatment plans that respect each patient's unique anatomy and aesthetic goals. This philosophy extends across all service lines, from surgical procedures including body contouring and facial rejuvenation to minimally invasive treatments such as laser therapy and injectable treatments.

"Every patient who walks through our doors has a unique vision for their appearance, and our role is to honor that vision while ensuring their safety remains paramount," said Aesthetic Plastic Surgery & Laser Center, Michelle Hardaway M.D. "After three decades in practice, I've learned that the most successful outcomes occur when we work with, rather than against, a patient's natural features."

The practice's commitment to natural aesthetics influences every aspect of patient care, from initial consultation through post-procedure recovery. Treatment plans are developed through comprehensive consultations that consider not only the desired outcome but also factors such as lifestyle, recovery time, and long-term maintenance. This thorough approach helps ensure that results align with patients' expectations while maintaining proportion and balance.

Aesthetic Plastic Surgery Farmington Hills has established protocols that prioritize patient safety at every stage of treatment. These protocols include detailed pre-operative assessments, state-of-the-art surgical facilities, and comprehensive post-operative care plans. The center's approach extends to non-surgical treatments as well, with careful attention to product selection, injection techniques, and treatment intervals.

The practice offers a comprehensive range of services designed to address various aesthetic concerns. Body contouring procedures help patients address changes from weight fluctuations, pregnancy, or aging. Facial and neck procedures range from targeted treatments to comprehensive rejuvenation. Breast surgery options include augmentation, lift, reduction, and reconstruction, each tailored to create balanced, proportionate results. The center also provides minimally invasive alternatives for patients seeking improvement without surgical intervention.

"The evolution of aesthetic medicine has provided us with remarkable tools and techniques, but technology alone doesn't create beautiful results," noted Dr. Hardaway. "Success comes from understanding each patient's unique anatomy, listening to their goals, and applying our expertise to achieve results that enhance rather than alter their natural appearance."

The center's patient-first philosophy extends beyond the treatment room. Staff members are trained to provide compassionate, confidential care that addresses both the physical and emotional aspects of aesthetic procedures. This comprehensive approach has established the practice as a trusted resource for patients throughout Michigan seeking aesthetic enhancement.

Aesthetic Plastic Surgery & Laser Center operates from its modern facility in Farmington Hills, Michigan. With over 30 years of experience, Dr. Michelle Hardaway has established a reputation for delivering personalized aesthetic solutions that prioritize both natural-looking results and patient safety. The practice continues to integrate advanced techniques and technologies while maintaining its foundational commitment to individualized, patient-centered care.
