Williams and Sons Custom Construction Expands Services to Include Comprehensive Interior Design and Renovation Solutions

November 03, 2025

CASSVILLE, MO - November 03, 2025 -
Williams and Sons Custom Construction and Design, a family-owned custom home builder serving Southwest Missouri for over 50 years, has expanded its service offerings to include comprehensive home renovation and remodeling solutions for existing homeowners throughout the region. The expansion addresses growing demand from residents in Monett, Golden, Eagle Rock, Shell Knob, and Cassville who seek to enhance their current properties rather than relocate.

The company, which has built its reputation as a premier Williams and Sons Custom Construction Custom Home Builder in Southwest Missouri, will now provide full-scale renovation services including kitchen and bathroom remodels, room additions, second-story expansions, and complete home transformations. This strategic expansion allows the company to serve both new construction clients and existing homeowners seeking professional renovation expertise.

"After five decades of building custom homes throughout Southwest Missouri, we recognized that many homeowners want the same level of craftsmanship and attention to detail applied to renovating their existing properties," said Trevor, a company spokesperson for Williams and Sons Custom Construction and Design. "Our expansion into comprehensive renovation services allows us to bring our proven construction methodology and hands-on approach to a broader range of residential projects."

The expansion includes enhanced Williams and Sons Custom Construction Architectural Design capabilities specifically tailored for renovation projects. The company's in-house design team will now provide both new construction blueprints and detailed renovation planning, enabling homeowners to visualize proposed changes before construction begins. This integrated approach eliminates the need for separate design consultants and ensures seamless communication throughout the renovation process.

Williams and Sons maintains its commitment to the same standards that have defined its custom home building operations. Company owners remain present on-site to oversee all renovation projects, ensuring quality standards are met while maintaining clean job sites and adhering to established timelines. The company's hands-on approach, which has been central to its custom home building success, will now benefit renovation clients throughout the region.

The renovation services complement the company's established new construction and custom home offerings, providing Southwest Missouri residents with a comprehensive range of residential building solutions. From minor home improvements to major structural additions, the expanded service portfolio addresses the full spectrum of homeowner needs while maintaining the personalized attention and quality craftsmanship that have characterized the company's work for half a century.

Williams and Sons Custom Construction and Design continues to offer free consultations for both new construction and renovation projects throughout its Southwest Missouri service area. The company's integrated approach to design and construction ensures that whether building new or renovating existing structures, clients receive consistent quality and professional expertise throughout their project.
