SERVPRO of Port Huron Emphasizes Readiness for Flood-Related Restoration Amid Michigan Dam Safety Concerns

November 03, 2025

KIMBALL, MI - November 03, 2025 -
SERVPRO of Port Huron is highlighting the availability of professional restoration and cleaning services near Kimball, MI, in response to recent state reports on dam infrastructure vulnerabilities. With Michigan facing ongoing challenges related to aging dams, the company stands prepared to assist property owners in managing potential water damage from flooding events.

Recent data from the Michigan Department of Environment, Great Lakes, and Energy indicates that more than 160 state-regulated dams carry a high hazard potential classification, where failure could result in significant loss of life and extensive property damage. This classification underscores the risks posed by structural deficiencies, environmental factors, and extreme weather patterns that could lead to breaches or overflows. In areas like those near Kimball, MI, where proximity to waterways heightens vulnerability, such concerns prompt a focus on preparedness and rapid response capabilities.

SERVPRO of Port Huron maintains a team equipped to address the aftermath of water intrusions, including those stemming from flood scenarios. The company's services encompass water extraction, structural drying,

and content cleaning to restore properties affected by excess moisture. Staff members undergo rigorous training at the SERVPRO corporate facility and pursue certifications from the Institute of Inspection, Cleaning and Restoration Certification to ensure proficiency in industry standards. This preparation enables the franchise to handle incidents ranging from minor leaks to major inundations, helping to prevent secondary issues such as mold growth.

In addition to water damage restoration, SERVPRO of Port Huron offers fire and smoke damage cleanup, mold remediation, and general property recovery solutions. These capabilities prove vital in a state where weather-related disasters, including severe storms and winter events, have historically caused billions in damages. From 1980 to 2024, Michigan experienced 60 weather and climate disaster events each exceeding one billion dollars in losses, illustrating the persistent threat to infrastructure and homes. The company's 24-hour emergency response protocol allows for immediate mobilization, which is crucial in mitigating escalation of damage.

"As Michigan grapples with dam safety issues that could lead to flooding, property owners must recognize the value of swift intervention to protect their investments," said Joshua A. Ingersoll, co-owner of SERVPRO of Port Huron. "Our established processes ensure that restoration efforts begin promptly, reducing downtime for both residential and commercial clients."

General Manager Byron Sevenski added, "Through continuous training and adherence to certified methods, the team at SERVPRO of Port Huron delivers consistent results in challenging situations. This commitment extends to educating communities on preventive measures against water damage, fostering resilience in the face of potential disasters."

The emphasis on dam safety arrives amid broader discussions on infrastructure maintenance in Michigan. State agencies continue to monitor and classify dams based on condition assessments, with high hazard designations prompting calls for inspections and upgrades. For communities near Kimball, MI, access to reliable restoration providers forms part of a comprehensive approach to risk management.

SERVPRO of Port Huron has demonstrated community involvement through recent activities, including participation in local events that promote awareness and engagement. Such efforts align with the company's role in supporting recovery after incidents, whether from natural causes or other sources of property harm.

The franchise's history of service includes handling diverse cases, from sewage backups to crime scene cleanups, as reflected in client feedback praising the professionalism of staff members. This track record reinforces the company's position as a resource for property owners navigating unexpected challenges.

SERVPRO of Port Huron operates as part of a national network of franchises, benefiting from shared

resources while maintaining local ownership. The company focuses on restoring properties to pre-damage conditions, employing advanced equipment and techniques tailored to each situation.

In light of the dam safety report and historical disaster patterns, SERVPRO of Port Huron encourages property inspections and maintenance to avert crises. By addressing vulnerabilities proactively, communities can better withstand potential impacts.

SERVPRO of Port Huron, independently owned and operated, has served the region since its establishment as a franchise of the SERVPRO brand, which originated in 1967. Locally managed by Joshua A. Ingersoll, Dean M. Dingman, and Eric D. Chesser, the company provides cleanup and restoration for residential and commercial properties in Port Huron, Fort Gratiot, St. Clair, East China, and nearby locales. The franchise's motto, "Like it never even happened," reflects its goal of thorough recovery following damage events.
