

Go Industries Inc Expands Truck Grille Guards Portfolio with Enhanced Winch Integration Systems

November 12, 2025

Richardson, TX - November 12, 2025 -
Go Industries Inc, a Texas-based manufacturer of heavy-duty truck protection equipment, has expanded its commercial-grade winch grille guard offerings to meet growing demand from fleet operators and commercial trucking companies across North America.

The expansion features modular grille guard systems with integrated winch mount capabilities designed specifically for heavy-duty commercial applications. The enhanced product line addresses the increasing need for versatile protection solutions that combine front-end defense with winch functionality for commercial and industrial vehicles.

Among the expanded offerings, Go Industries has positioned its best winch grille guard solutions to accommodate both 9.5 and 16.5 winch carriers, providing operators with flexibility in selecting recovery equipment appropriate for their vehicle weight and operational requirements. Optional brush guards complement vehicle lines while offering additional protection to the headlight area from road debris and

off-road brush.

"The expansion of our winch grille guard systems reflects the evolving needs of commercial truck operators who require both protection and recovery capabilities in a single, integrated solution," said a Go Industries spokesperson. "These modular systems allow fleet managers to customize their truck protection based on specific operational requirements while maintaining the durability standards our customers have relied on since 1978."

The modular grille guard with winch mount system enables commercial operators to configure their truck protection according to their unique operational demands. Constructed from 5/16-inch laser-cut steel uprights with 2.5-inch 16-gauge steel cross tubes, the guards provide substantial protection for commercial vehicles operating in challenging environments. The system includes custom, heavy-duty mounting brackets engineered for maximum strength and simplified installation.

The expansion complements Go Industries' existing portfolio of worktruck accessories, which includes headache racks, bumper replacements, air flow tailgates, and mudguards. All products in the expanded winch grille guard line carry a three-year warranty covering materials, workmanship, and finish.

"Commercial truck operators need equipment that performs reliably in demanding conditions," added the Go Industries representative. "Our expanded winch grille guard line delivers that reliability while providing the customization options necessary for diverse fleet applications."

The enhanced product offerings align with industry trends showing increased demand for multifunctional truck protection systems. Fleet managers and owner-operators seeking comprehensive protection solutions can now select from a broader range of configurations to match their specific vehicle models and operational requirements.

Go Industries continues to manufacture all products at its Texas facilities, maintaining its commitment to domestic production. The company's range of accessories serves commercial trucking companies, law enforcement agencies, and custom manufacturing clients throughout North America.

Go Industries Inc has been designing and manufacturing truck protection equipment and law enforcement vehicle equipment since 1978. The company specializes in front and back-end protection systems, custom manufacturing solutions, and specialized equipment for commercial and law enforcement vehicles. Based in Richardson, Texas, Go Industries maintains Platinum Status with the Specialty Equipment Market Association and continues to expand its product offerings to meet evolving market demands.
