

## **HingePoint Releases BOM To Excel Autodesk Revit Productivity Plugin**

*March 07, 2016*

March 07, 2016 - PRESSADVANTAGE -

Dallas, Texas based HingePoint has announced the launch of a new productivity plugin for Autodesk® Revit®. The BOM and Estimating App is easy to use and works with Autodesk tools like Revit Architecture, Revit Structures and Revit MEP. Bryce Finnerty Chief Solutions Architect for HingePoint states, "This amazingly powerful productivity plugin will save 100's of hours in BOM (Bill of Materials) data analysis, reporting and quantity estimation so you can mine the data right out of your building information model (BIM) in Revit."

The company states that the app will install in less than 30 seconds, and helps to export BOMs, reports, estimates, and quantity takeoffs - tasks that normally take businesses much longer than necessary. The app is designed to cut the time needed to perform these tasks, while still providing efficient results. In fact, Finnerty says that the plugin come with a guarantee to provide a positive return on investment. "We invite you to learn more about the BOM to Excel Revit Plugin and judge for yourself just how easy it is."

The newly developed app is available now, and can be accessed through the company's website or directly from the Autodesk App Store. HingePoint states that the newly launched app includes everything from

support and training to free upgrades. Those interested can download a free trial or purchase the full app version with a money back guarantee from the company.

HingePoint is a consulting and development company that has been integrating systems and technologies since the early 1990s. The company works across the architecture, engineering and construction (AEC) industry leaders in an effort to automate and streamline processes, discovering practical solutions for clients. The company is an Autodesk Development Network partner and clients range from hotel brands and restaurants to commercial real estate developers. Those interested can learn more about HingePoint on their official website.
