

Northwest Plumbing Heating & AC Announces Enhanced Furnace Repair Services for Winter Season

November 04, 2025

DAVENPORT, Iowa - November 04, 2025 -
Northwest Plumbing Heating & AC has announced expanded furnace repair and maintenance services to address increased demand for heating system support across the Quad Cities region. The company, which has served Iowa and Illinois communities since 1923, has introduced enhanced diagnostic procedures and flexible scheduling options to help homeowners maintain reliable heating throughout the winter months.

The expanded service offerings come as temperatures continue to drop across the region and homeowners face growing concerns about heating system reliability. The company has restructured its service programs to provide comprehensive maintenance packages that include detailed system inspections, preventative repairs, and priority scheduling for both heating and plumbing services.

"With nearly a century of experience serving the Quad Cities, we understand how critical reliable heating is during Iowa winters," said Bill Durand, Service Manager at Northwest Plumbing Heating & AC. "Our enhanced furnace repair services and preventative maintenance programs are designed to help homeowners

avoid emergency breakdowns while improving system efficiency and reducing energy costs throughout the heating season."

The company's Service Partner Agreements, starting at $99 annually, provide scheduled maintenance visits, priority service scheduling, and waived after-hours fees. These preventative maintenance plans cover furnace systems, boilers, geothermal heating, and high-efficiency equipment. The expanded program also includes enhanced plumbing services coverage, recognizing that frozen pipes and water heater failures often coincide with extreme winter weather conditions.

Northwest Plumbing Heating & AC offers comprehensive heating services including furnace repair and installation, annual heating system checks, humidifier installation, boiler repair and installation, geothermal systems, steam heat, hot water heat, mini-splits, high-efficiency heating and cooling systems, and zoning solutions. The company maintains 24-hour emergency service availability to address urgent heating system failures.

The company has also introduced flexible financing options through GreenSky to help homeowners manage unexpected repair costs or system replacements. Monthly specials and seasonal promotions provide additional opportunities for customers to access professional heating services at reduced rates.

This news article highlights the importance of proactive heating system maintenance as winter weather intensifies across the Midwest. Industry data shows that regular maintenance can extend equipment life by up to 40 percent while reducing energy consumption by as much as 30 percent during peak heating months.

Northwest Plumbing Heating & AC operates from its Davenport headquarters, serving residential customers throughout the Quad Cities area. The family-owned business maintains a 4.8 out of 5.0 rating on its Google Business Profile from over 600 customer reviews. Beyond heating services, the company provides comprehensive plumbing and air conditioning solutions, including water heater services, drain cleaning, sewer repair, fixture replacements, and sump pump installations. The company's century-long presence in the community reflects its commitment to reliable service and customer satisfaction.
