

Go Industries Inc Expands Winch Grille Guards System for Commercial Trucks

November 17, 2025

Richardson, TX - November 17, 2025 -
Go Industries Inc, a Richardson, Texas-based manufacturer of heavy-duty truck accessories, has expanded its commercial-grade winch grille guard offerings to meet growing demand from fleet operators and commercial truck owners seeking integrated winch systems with enhanced protection capabilities.

The expanded product line features modular-style grille guards that serve as a foundation for adding winch carriers and brush guards, addressing the needs of commercial operators who require versatile front-end protection solutions. The system accommodates both 9.5 and 16.5 winch carriers, providing flexibility for various commercial applications.

Constructed from 5/16-inch laser-cut steel uprights and 2.5-inch 16-gauge steel cross tubes, the winch grille guards deliver substantial protection for commercial vehicles operating in demanding environments. The modular design allows operators to customize their front-end protection based on specific operational requirements.

"The expansion of our winch grille guard system reflects our commitment to providing commercial truck operators with durable, adaptable protection solutions," said a Go Industries spokesperson. "These guards are engineered to withstand the rigors of commercial use while maintaining the flexibility to accommodate various winch configurations and optional brush guards for additional headlight protection."

The company's expansion of its winch grille guard offerings coincides with its introduction of new storage solutions, including topside shovel boxes designed for commercial work trucks. These perforated metal boxes measure 72 inches by 18 inches by 10 inches, providing secure storage for long-handled tools while allowing dirt and debris to fall through, preventing accumulation within the storage compartment.

The system includes custom heavy-duty mounting brackets designed for maximum strength and simplified installation. Optional brush guards can be added to complement vehicle lines and create additional protection for the headlight area from road debris and off-road brush. All components are manufactured in the USA and backed by a three-year warranty covering materials, workmanship, and finish.

Go Industries has observed increased demand for integrated winch systems among commercial fleet operators, construction companies, and utility service providers. The modular approach allows businesses to configure their trucks based on specific job requirements without compromising protection or functionality.

Industry professionals seeking the best winch grille guard for their commercial vehicles can now choose from an expanded range of configurations that accommodate different winch sizes and protection requirements. The modular system enables fleet managers to standardize equipment across their vehicle inventory while maintaining flexibility for specialized applications.

Go Industries Inc has been manufacturing truck accessories and commercial vehicle equipment since 1978. The company's product line includes heavy-duty headache racks, grille guards, bumper replacements, air flow tailgates, and mud flaps. As a Platinum Status member with SEMA, Go Industries maintains high standards for product quality and customer service. The company serves commercial fleet operators, law enforcement agencies, and individual truck owners throughout North America, offering both standard products and custom manufacturing services.
