

Advocaat Zeden Founder Releases Book Exploring Complex Sexual Offense Cases in Belgium

November 17, 2025

ANTWERPEN, BE - November 17, 2025 -
SUE Lawyers, a Belgian law firm with expertise in both sexual offense cases and general criminal law, announces that its founder, Sanne De Clerck, has written a comprehensive book examining the evolving landscape of sexual crime law and its practical implications in modern society.

The book, titled "U bent de eerste aan wie ik dit vertel" (You Are the First Person I'm Telling This To), provides readers with unprecedented insights into the complexities of sexual offense cases through the lens of experienced legal practice. Published by Borgerhoff & Lamberigts, the work addresses critical questions surrounding consent, power dynamics, and the changing definitions of sexual crimes in contemporary Belgium.

"The term 'rape' has evolved to encompass many different situations, and it's crucial that we understand these distinctions while maintaining respect for all parties involved," stated Sanne De Clerck. "Through this book, I aim to provide clarity on complex legal matters while highlighting the importance of proper legal

representation in these sensitive cases."

Sanne De Clerck, founder of SUE Lawyers and a sexual offense lawyer in Belgium with extensive experience in high-profile cases, draws from years of courtroom experience to illuminate the nuanced challenges facing both victims and accused individuals in sexual offense proceedings. The book explores various case types, from situations involving dating applications to complex family dynamics, offering readers a comprehensive understanding of how sexual offense law operates in practice.

The publication addresses several pressing topics in contemporary sexual offense law, including the impact of technology on sexual crimes, the role of power dynamics in consent, and the challenges of navigating cases involving minors. De Clerck examines how digital communication and social media have created new legal complexities that previous generations never encountered.

The book also discusses the importance of specialized legal expertise in sexual offense cases, demonstrating how proper legal guidance can make a significant difference in achieving just outcomes. Through real-world examples and careful analysis, the work illustrates why individuals facing sexual offense allegations or victims seeking justice benefit from working with attorneys who understand the intricacies of this area of law.

"Sexual offense cases require not just legal knowledge but also an understanding of psychology, technology, and evolving social norms," explained De Clerck. "This book aims to bridge the gap between legal theory and practical application, helping readers understand how these cases unfold in the real world."

SUE Lawyers has established itself as a leading practice in sexual offense law throughout Flanders, offering confidential consultations and specialized legal representation. The firm handles a comprehensive range of cases including rape, sexual assault, child pornography, public indecency, voyeurism, grooming, and incest. Operating from Antwerp, the firm provides services across Belgium and maintains a strong commitment to both victim representation and defense work.

The release of this book reinforces the firm's dedication to education and transparency in an area of law often shrouded in misconception and stigma. For those seeking more information about sexual offense law in Belgium, the firm maintains an informative website at advocaatzeden.be.
