

RestoPros of San Antonio Celebrates IICRC Certification Achievement

October 31, 2025

October 31, 2025 -
RestoPros of San Antonio has achieved certification from the Institute of Inspection, Cleaning and Restoration Certification (IICRC), reinforcing the company's commitment to maintaining the highest industry standards in restoration services. The certification validates the company's adherence to technical expertise and ethical practices in water damage restoration and other emergency restoration services.

The IICRC certification represents a significant milestone for the restoration company, which has served the San Antonio community with emergency restoration services for residential and commercial properties. The certification process requires companies to demonstrate proficiency in restoration techniques, maintain ongoing education requirements, and follow established industry protocols for various restoration scenarios.

"Achieving IICRC certification demonstrates our dedication to providing the highest quality restoration services to our community," said Francisco Robelo, owner of RestoPros of San Antonio. "This certification validates our team's expertise and our commitment to following industry best practices in every restoration

project we undertake."

The IICRC sets global standards for the inspection, cleaning, and restoration industries. Companies earning this certification must meet rigorous requirements including technical proficiency, ethical business practices, and commitment to continuing education. For property owners facing emergency situations, IICRC certification provides assurance that restoration work will be performed according to established industry standards.

RestoPros of San Antonio specializes in comprehensive restoration services including water damage restoration, fire and smoke damage restoration, mold remediation, storm damage restoration, and complete rebuild services. The company provides 24/7 emergency response services throughout San Antonio and surrounding communities, ensuring rapid response when disasters strike.

The certification comes as the company continues to expand its service capabilities to meet growing demand for professional restoration services in the San Antonio area. With 30 years of combined industry experience, the team at RestoPros has established a reputation for dependable service and quality workmanship.

Water damage incidents, whether from burst pipes, storm damage, or other causes, require immediate professional attention to prevent secondary damage such as mold growth. The IICRC certification ensures that RestoPros follows standardized procedures for water extraction, drying, dehumidification, and restoration that minimize property damage and health risks.

The company's restoration process includes comprehensive inspection and assessment, water extraction, professional drying and dehumidification, thorough cleaning and sanitizing, and complete restoration and repair services. Each step follows IICRC guidelines to ensure properties are properly restored to pre-loss condition.

Beyond technical expertise, the certification also encompasses ethical business practices and customer service standards. RestoPros offers free inspections and detailed quotes for all restoration projects, helping property owners understand the scope of work required and associated costs.

RestoPros of San Antonio serves the greater San Antonio area including Converse, JBSA Fort Sam Houston, JBSA Lackland, and surrounding communities. The company maintains full insurance coverage and follows all safety protocols to protect both customers and restoration technicians during the restoration process. As an IICRC certified firm, RestoPros continues to invest in ongoing training and education to stay current with evolving restoration technologies and methodologies.
