

USA Cabinet Store Unveils 2026 Kitchen and Bathroom Remodel Trends for New Jersey Homeowners

November 03, 2025

CHERRY HILL, NJ - November 03, 2025 -
USA Cabinet Store, a multi-state kitchen and bathroom remodeling specialist with showrooms across eight states, announced its comprehensive guide to emerging design trends that will shape kitchen and bath remodel projects and home renovations throughout 2026. The Cherry Hill, NJ Showroom has analyzed data from the National Kitchen & Bath Association, Houzz, and Harvard research to identify key patterns specifically relevant to New Jersey homeowners planning renovations in the coming year.

The announcement comes as the remodeling industry projects steady growth, with Harvard's Leading Indicator of Remodeling Activity forecasting total homeowner spending to reach $524 billion in early 2026. This economic backdrop provides validation for homeowners considering kitchen and bath remodel projects in the Garden State.

"New Jersey homeowners are embracing a distinctive blend of transitional and traditional design elements, with 39 percent showing preference for this combined aesthetic," said Emin Halac, President of USA Cabinet

Store. "The four-season climate in our region demands durable materials like sealed woods and quartz that can withstand humidity variations and freeze-thaw cycles, while multi-generational living arrangements are driving increased demand for accessibility features in both kitchens and bathrooms."

For kitchen remodel trends 2026, the company reports that white oak has emerged as the leading material choice among 51 percent of design professionals surveyed. Kitchen footprints are expanding, with 76 percent of industry experts expecting growth in kitchen size, often incorporating space from adjacent dining and living areas. Quartz and quartzite dominate countertop selections at 62 and 61 percent respectively, while neutral color palettes with green and blue accents reflect New Jersey's proximity to both metropolitan Philadelphia and the Shore communities.

The shift toward minimalist design includes frameless cabinetry options from brands like Fabuwood, warm metallic hardware finishes, and statement lighting fixtures that 87 percent of designers now consider essential. Kitchen islands have evolved into lifestyle hubs, incorporating beverage stations in 85 percent of new designs and dedicated pet feeding areas in 64 percent of renovations.

Bathroom remodel trends 2026 reveal an increased focus on wellness and accessibility. According to industry data, 68 percent of bathroom renovations now factor in special needs considerations, with grab bars installed in 61 percent of projects, nonslip flooring in 55 percent, and low-curb showers in 52 percent. The spa-inspired bathroom movement continues gaining momentum, with wet rooms appearing in 16 percent of high-end renovations, representing a three-point increase from previous years.

Investment levels for New Jersey bathroom renovations range from $13,000 for standard updates to $22,000 for major remodels, with 84 percent of homeowners engaging professional contractors for their projects. Floating vanities featuring warm wood tones, matte black hardware, and brushed gold accents from suppliers like Jeffrey Alexander align with current design preferences while addressing practical concerns about moisture resistance.

USA Cabinet Store operates 13 showrooms across Virginia, Maryland, North Carolina, Texas, New Jersey, Missouri, Florida, and Tennessee. Since 2011, the company has completed projects for over 1,000 customers, earning recognition as a Top 50 Remodeling Company. The Cherry Hill location serves Camden, Burlington, and Gloucester counties in New Jersey, as well as portions of Pennsylvania.
