

Lazaderm Chandler Arizona Expands Aesthetic Skincare Services with Advanced HydraFacial Treatments

November 12, 2025

CHANDLER, AZ - November 12, 2025 -
Lazaderm, a physician-led medical spa in Chandler, Arizona, has expanded its aesthetic skincare offerings with enhanced HydraFacial treatments designed to address an array of skin concerns and deliver personalized results for clients seeking non-invasive facial rejuvenation.

The expansion of aesthetic skincare services at the Chandler location reflects growing demand for medical-grade facial treatments that combine deep cleansing, exfoliation, extraction, and hydration in a single session. The HydraFacial technology utilizes patented vortex-fusion delivery to cleanse and nourish skin while addressing specific concerns including fine lines, uneven texture, congestion, and dehydration.

"The addition of advanced HydraFacial protocols allows us to customize treatments based on individual skin needs and concerns," said Kayla Goblirsch, Clinical Director at Lazaderm. "Each treatment plan is tailored to the client's unique skin type, whether they're addressing acne scarring, seeking anti-aging benefits, or simply

maintaining healthy skin. The immediate results and zero downtime are aimed at clients with busy lifestyles."

The medical spa's comprehensive approach to aesthetic skincare incorporates HydraFacial treatments alongside other advanced modalities including chemical peels, microneedling, and laser resurfacing options. This integrated service menu enables the clinical team to develop multi-modal treatment plans that optimize outcomes for various skin conditions.

Client satisfaction remains a priority for the Chandler facility, as evidenced by consistent positive feedback. A recent Five-star review of Lazaderm highlighted the clinic's professionalism, efficiency, and commitment to maintaining pristine treatment environments. The review also noted the facility's accommodation of same-day appointments and implementation of a loyalty rewards program for regular clients.

Beyond HydraFacial treatments, the Chandler location offers an extensive range of aesthetic services including neurotoxin injections such as Botox and Dysport, dermal fillers from leading brands like Juvederm and Restylane, laser hair removal, CoolSculpting body contouring, and specialized treatments for acne scarring. The clinic's BroadBand Light therapy and Moxi laser treatments provide additional options for skin rejuvenation and pigmentation correction.

The physician-led approach distinguishes the medical spa from traditional day spas, ensuring that all treatments are performed under medical supervision with appropriate safety protocols. The clinical team includes licensed estheticians and medical professionals trained in the latest aesthetic techniques and technologies.

Complimentary consultations are available for individuals interested in exploring treatment options. During these sessions, the clinical team evaluates skin concerns, discusses treatment goals, and develops personalized care plans aligned with each client's objectives and timeline.

Lazaderm operates multiple locations across the United States, including facilities in Sioux City, Iowa; Fargo, North Dakota; Sioux Falls, South Dakota; and Watertown, South Dakota. The company maintains a focus on delivering medical-grade aesthetic treatments through a combination of advanced technology, clinical expertise, and personalized care protocols. The Chandler location continues to serve the Arizona community with comprehensive aesthetic and laser treatments designed to enhance natural beauty and promote skin health.
