Performance Seamless Gutters Expands Services with Permanent Outdoor Lighting Solutions in Pennsylvania

November 04, 2025

NEW BRIGHTON, PA - November 04, 2025 -
Performance Seamless Gutters, a New Brighton-based home improvement company with over 24 years of experience, has expanded its service offerings to include permanent outdoor lighting installation through a partnership with Celebright, a provider of app-controlled architectural lighting systems.

The addition of permanent lighting services represents a strategic expansion beyond the company's traditional focus on gutter installation, repairs, and maintenance. The new offering allows homeowners to install discreet, low-voltage lights along rooflines and architectural features that can be customized through a mobile application for various occasions throughout the year.

The Celebright system being installed by Performance Seamless Gutters features energy-efficient LED technology designed for long-term outdoor use. Once installed, the lighting requires minimal maintenance and can be controlled remotely, allowing property owners to adjust colors and patterns for holidays, special events, or everyday ambiance. The system's versatility enables users to create custom lighting designs that complement their home's architecture while providing enhanced security and curb appeal.

"Adding permanent lighting installation to our services was a natural progression for our company," said Tim Grech, owner of Performance Seamless Gutters. "We already work extensively on rooflines and exterior structures, so we have the expertise and equipment to properly install these sophisticated lighting systems. This expansion allows us to offer our customers a complete exterior enhancement solution that goes beyond traditional gutter services."

The permanent lighting systems differ from temporary holiday decorations in their durability and year-round functionality. The lights are designed to withstand various weather conditions common in Pennsylvania, including snow, rain, and temperature fluctuations. The installation process involves mounting the lights securely along the roofline and other architectural elements, ensuring they remain in place and functional throughout all seasons.

For commercial properties, the lighting systems offer additional benefits including programmable scheduling for business hours, brand color customization, and enhanced visibility for signage and architectural features. The app-based control system allows property managers to adjust lighting remotely, reducing the need for manual adjustments or seasonal decoration changes.

The expansion into permanent lighting services complements the company's existing offerings, which include seamless gutter installation, gutter guards, soffit and fascia repair, siding installation, and commercial gutter services. The company specializes in various gutter materials including copper, aluminum, and steel, offering both half-round and K-style gutter solutions.

Performance Seamless Gutters has built its reputation on providing customized solutions tailored to each property's specific structure and environmental needs. The company serves both residential and commercial clients throughout the New Brighton area and surrounding Pennsylvania communities. With the addition of permanent lighting installation, the company now offers a more comprehensive approach to exterior home improvement, addressing both functional drainage needs and aesthetic enhancement.

The company maintains its commitment to quality workmanship and customer service that has earned it positive reviews from clients. As a locally owned and operated business, Performance Seamless Gutters continues to focus on delivering reliable home improvement solutions that protect and enhance property values throughout the region.
