AIM Green Restoration Expands Water Damage Services Across Central Ohio

November 04, 2025

COLUMBUS, OH - November 04, 2025 -
AIM Green Restoration, a family-owned restoration company serving Franklin and Delaware Counties, announced today the expansion of its water damage restoration services to better serve residential and commercial clients throughout Central Ohio. The enhanced service capabilities include advanced equipment deployment, faster response times, and expanded coverage areas to address the growing demand for professional restoration services in the region.

The Columbus-based restoration company has strengthened its water damage restoration offerings to provide more comprehensive solutions for property owners facing emergencies ranging from burst pipes and flooded basements to sewage backups and water heater failures. The expansion comes as severe weather patterns and aging infrastructure continue to increase the frequency of water-related incidents across Central Ohio communities.

"Property damage from water intrusion requires immediate professional attention to prevent secondary issues like mold growth and structural deterioration," said Isaiah Morgan, Operations Director at AIM Green Restoration. "Our expanded services ensure that residents and businesses throughout Franklin and

Delaware Counties have access to certified restoration professionals who can respond within 60 minutes of their initial call, minimizing damage and accelerating the recovery process."

The company's comprehensive approach to water damage restoration includes thorough assessment of affected areas, water extraction using state-of-the-art equipment, structural drying and dehumidification, and complete restoration of damaged materials. Each project begins with thermal imaging and moisture detection to identify hidden water pockets that could lead to future problems if left untreated.

Beyond water damage services, the company provides fire and smoke damage restoration, mold remediation, and biohazard cleanup services. The integrated approach allows property owners to work with a single restoration provider for multiple damage scenarios, streamlining the recovery process and insurance claim handling.

The expansion particularly benefits communities including Columbus, Dublin, Westerville, Worthington, Pickerington, Gahanna, New Albany, Grove City, Delaware, Hilliard, Blacklick, and Lockbourne. The company maintains 24-hour emergency response capabilities throughout these service areas, recognizing that water damage emergencies can occur at any time and require immediate professional intervention.

"Insurance claim processing often presents additional stress for property owners already dealing with damage to their homes or businesses," added Morgan. "Our team works directly with all major insurance carriers to document damage, provide detailed restoration plans, and handle the administrative burden of claims processing, allowing our clients to focus on returning to normal life."

The company holds certifications from the Institute of Inspection, Cleaning and Restoration Certification (IICRC), ensuring all restoration work meets industry standards for safety and effectiveness. Technicians receive ongoing training in the latest restoration techniques and safety protocols, particularly important for handling contaminated water situations and potential biohazard scenarios.

AIM Green Restoration is a fully licensed and insured restoration company specializing in emergency response services for water, fire, mold, and biohazard damage. The family-owned business serves residential and commercial clients throughout Franklin and Delaware Counties in Central Ohio, providing 24-hour emergency response and comprehensive restoration services.
