

RestoPros of Knoxville Expands Damage Restoration Services to Better Serve Customers

November 05, 2025

KNOXVILLE, TN - November 05, 2025 -
RestoPros of Knoxville has expanded its damage restoration services across the greater Knoxville region to better serve residential and commercial property owners facing water, fire, mold, and storm damage emergencies. The expansion enhances the company's ability to provide rapid response times and comprehensive restoration solutions throughout Farragut, Oak Ridge, Maryville, Powell, and surrounding Tennessee communities.

The service expansion comes as severe weather patterns and aging infrastructure continue to drive increased demand for professional restoration services across East Tennessee. The company's enhanced service capacity enables faster deployment of certified restoration technicians and specialized equipment to properties experiencing emergency damage situations.

"Property damage from water, fire, or storms can be devastating for families and businesses, and every minute counts when it comes to minimizing further damage and beginning the restoration process," said Greg

Kendig, spokesperson from RestoPros of Knoxville. "This expansion allows us to deploy our teams more efficiently across the region while maintaining the same high standards of service that property owners have come to expect from our company."

The expanded services encompass water damage restoration for incidents ranging from pipe bursts to flooding, fire and smoke damage restoration, comprehensive mold remediation, and storm damage repairs. Each service area follows strict protocols established by the Institute of Inspection Cleaning and Restoration Certification (IICRC), ensuring that all restoration work meets industry standards for safety and effectiveness.

Water damage situations require immediate attention to prevent structural deterioration and mold growth. The company's water restoration specialists utilize advanced moisture detection equipment and industrial-grade drying systems to extract water and restore properties to their pre-damage condition. Similarly, fire and smoke damage restoration requires specialized techniques to address both visible damage and hidden contamination that can affect indoor air quality.

Mold remediation has become an increasingly critical service as property owners recognize the health risks associated with mold growth following water or fire emergencies. The restoration teams implement comprehensive remediation protocols to eliminate existing mold and prevent future growth through proper moisture control and ventilation improvements.

"Our 30 years of combined industry experience has taught us that successful damage restoration requires more than just technical expertise," added Kendig. "Property owners need a restoration partner who understands the stress and disruption that damage events cause and can guide them through the entire restoration process with professionalism and compassion."

The company maintains 24/7 emergency response capabilities, recognizing that damage events rarely occur during regular business hours. This round-the-clock availability ensures that property owners can access professional restoration services whenever disasters strike, minimizing secondary damage and accelerating the recovery process.

RestoPros of Knoxville is a certified and insured restoration service provider specializing in water, fire, mold, and storm damage restoration for residential and commercial properties throughout East Tennessee. With three decades of combined industry experience, the company follows IICRC guidelines and maintains comprehensive insurance coverage to protect clients throughout the restoration process. The company serves Knoxville, Farragut, Oak Ridge, Maryville, Powell, Louisville, Kodak, Strawberry Plains, and surrounding communities with 24/7 emergency response services.
