

All In Solutions California Expands Outpatient Treatment Programs to Support Long-Term Recovery

December 09, 2025

SIMI VALLEY, CA - December 09, 2025 -
All In Solutions California has expanded its comprehensive outpatient treatment programs to better serve individuals transitioning from detoxification and residential care into sustainable, long-term recovery. The expansion emphasizes the critical role that structured outpatient care plays in helping clients rebuild their lives while maintaining sobriety.

The addiction treatment center, located in Simi Valley, CA, recognizes that while detoxification marks an essential first step in recovery, the journey toward lasting sobriety truly takes shape during outpatient treatment. Through programs including Partial Hospitalization (PHP), Intensive Outpatient (IOP), and standard outpatient services, clients receive structured support while gradually resuming daily responsibilities.

"Outpatient care is where recovery begins to integrate into real life. By balancing structure with independence, clients develop the confidence to succeed beyond treatment," said Elizabeth Rahmani,

Counselor, RADT at All In Solutions California.

All In Solutions California outpatient programs combine evidence-based therapies with peer support networks and practical life skills development. Each client receives individualized counseling tailored to their specific needs, alongside group therapy sessions that foster community and shared learning experiences. The programs emphasize relapse prevention education and coping strategies that prepare individuals for the challenges they may face outside the treatment environment.

The facility's approach to outpatient care addresses both substance use disorders and co-occurring mental health conditions, recognizing the complex nature of addiction recovery. Clients benefit from a seamless continuum of care, with many transitioning directly from the center's medical detox and residential programs into outpatient services. This integrated approach ensures consistency in treatment philosophy and therapeutic relationships throughout the recovery journey.

All In Solutions California in Simi Valley, CA offers flexible scheduling options that accommodate work, education, and family commitments. The PHP program provides intensive therapeutic support with clients spending between seven and eight hours daily in clinical programming, six days per week. For those requiring less intensive support, the IOP offers several therapy sessions weekly while allowing greater independence.

Michael Maddaloni, COO at All In Solutions, emphasized the importance of matching treatment intensity to individual needs. "Every person's recovery journey is unique. Our outpatient programs provide varying levels of support to meet clients where they are in their recovery process while challenging them to grow and develop essential life skills."

The expansion of outpatient services reflects growing recognition within the addiction treatment community that recovery extends far beyond initial detoxification and residential care. By providing comprehensive outpatient support, treatment centers help bridge the gap between intensive inpatient care and independent living.

All In Solutions California serves the Simi Valley community and surrounding areas with evidence-based addiction treatment services. The organization as a whole offers medical detox, residential treatment, partial hospitalization, intensive outpatient programs, and specialized components including trauma-focused treatment and family therapy integration. The center works with most private health insurance plans to ensure accessible care for those seeking recovery from substance use disorders.
