

Just 4 Kids Preschool Expands with Opening of Temecula Location

November 12, 2025

TEMECULA, CA - November 12, 2025 - PRESSADVANTAGE -

Just 4 Kids Preschool has expanded its network of early childhood education centers with the opening of a new facility in Temecula, California. The addition provides childcare services to families in the area, aligning with the organization's approach to fostering development through structured programs and play-based learning. Established in 1998, the family-owned provider now operates multiple sites across Southern California.

The new Childcare & Daycare Center in Temecula, CA, serves children from six weeks old to five years old. Infant care caters to those aged six weeks to 24 months, emphasizing individualized attention to developmental milestones. Toddler programs target two- to three-year-olds who are not yet potty trained, focusing on exploration and social interaction. Preschool offerings for three- to five-year-olds who must be potty trained aim to build kindergarten-readiness skills.

Curriculum at the Temecula site incorporates the Frog Street program, which supports foundations in math, literacy, and social-emotional development. Daily activities include music and dance sessions that address sound recognition, language skills, balance, coordination, memory, rhythm, and counting. Learning centers

encourage exploratory play, role-playing, dress-up, pre-reading, pre-writing, and practical life skills. The facility features hands-on materials, toys, games, books, and age-appropriate furniture to facilitate child-led learning.

Outdoor spaces include shaded playgrounds with misting systems, sand play areas, tricycles, climbers with slides, blocks, trucks, and balls. Indoor gross motor areas accommodate physical activity during inclement weather. Summer programming includes field trips twice a week to local sites such as zoos, libraries, and museums. Community professionals, including dentists, doctors, firefighters, and police officers, visit in-house to introduce children to societal roles.

Meals comprise breakfast, lunch, and snacks that adhere to USDA guidelines via participation in California's Child and Adult Care Food Program. The organization incorporates organic ingredients when possible and pursues a USDA grant to expand this practice. Tuition includes all meals.

Safety protocols encompass 24/7 CCTV monitoring with recorded footage and badge-restricted access for authorized persons. Behavior guidance uses positive redirection, with incident reports provided to parents when applicable. Staff ratios follow standards: one teacher to four infants, one to ten toddlers or preschoolers. All employees undergo background checks, health assessments, and reference verifications.

Just 4 Kids Preschool assists families by securing subsidies from state and county agencies, supporting approximately one-third of enrolled children. Options include flexible scheduling, sibling and military discounts, drop-in care, and extended hours. New families benefit from a 14-day money-back guarantee, while a referral program grants three weeks of free tuition to both the referrer and the new enrollee, allocated over three months.

Community activities feature holiday programs, Mother's Day and Father's Day events, Thanksgiving gatherings, Halloween trick-or-treating, and Easter egg hunts. The organization contributes internationally by donating to AnCOP, sponsoring 15 scholarships for students in underserved regions of the Philippines and Latin America.

"Opening the Temecula location allows Just 4 Kids Preschool to reach more families seeking structured early education," said Alvin, co-owner of Just 4 Kids Preschool. "Programs at this site integrate proven curricula with daily activities designed to support holistic child development."

Joy, co-owner of Just 4 Kids Preschool, added, "Family involvement remains key, with open communication and an invitation for parents to observe and participate in daily routines."

Just 4 Kids Preschool started in Hesperia in 1998 and incorporated infant and toddler care in 2010. Owners

Alvin and Joy, immigrants from the Philippines, bring expertise in education, philosophy, teaching, sales, marketing, and customer service. The provider holds a quality rating from the Department of Education's Quality Counts California program and has won the "Best in the Desert" award for childcare from Daily Press readers for three years in a row. Teachers collectively offer 78 years of experience, and directors provide 36 years combined.

Core values of trust, respect, fun, passion, and integrity underpin operations. The Temecula expansion includes a newly renovated facility with state-of-the-art educational and play features. Daily updates via the BrightWheel app share photos, activity details, feedings, and progress reports with parents.
