

Amana Care Clinic - Muscatine Expands Telehealth Services for Urgent Care Access

November 18, 2025

MUSCATINE, Iowa - November 18, 2025 -
Amana Care Clinic - Muscatine has expanded its telehealth platform to provide remote medical consultations for patients throughout Muscatine and surrounding Iowa communities. The enhanced service addresses growing demand for accessible healthcare alternatives while reducing unnecessary visits to traditional healthcare facilities.

The expanded telehealth platform enables patients to receive medical consultations from certified healthcare professionals without leaving their homes. This service complements the facility's established walk in clinic services, providing patients with multiple options for receiving timely medical attention. The platform operates independently from the facility's online reservation system and integrates seamlessly with existing medical records to ensure comprehensive care delivery.

Patients can now access virtual consultations for various non-emergency conditions including cold symptoms, sinus infections, urinary tract infections, rashes, and minor injuries. The service provides an initial

assessment avenue for patients uncertain about the severity of their symptoms, helping them determine whether in-person care is necessary.

"The expansion of our telehealth capabilities reflects our commitment to providing accessible healthcare options for the Muscatine community," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic - Muscatine. "This service helps reduce unnecessary emergency room visits while ensuring patients receive timely medical attention for their conditions. Many patients with minor illnesses can receive effective treatment through virtual consultations, saving them time and reducing their exposure to other illnesses."

The urgent care clinic continues to provide comprehensive in-person services for conditions requiring physical examinations or diagnostic testing. The facility maintains full laboratory services, X-ray capabilities, and treatment options for injuries, infections, childhood illnesses, and sports physicals. Patients requiring immediate attention can still utilize the walk-in services without appointments, experiencing shorter wait times compared to hospital emergency departments.

The telehealth expansion comes as healthcare facilities nationwide adapt to changing patient preferences and technological advancements. Studies indicate that virtual consultations can effectively address approximately 70 percent of urgent care needs, particularly for routine infections, medication refills, and follow-up appointments.

The platform's integration with existing medical records ensures continuity of care between virtual and in-person visits. Healthcare providers can access patient histories, previous diagnoses, and treatment plans during telehealth consultations, maintaining the same standard of care available during physical visits.

Amana Care Clinic - Muscatine serves as a healthcare resource for residents and businesses throughout the region, offering treatment for abrasions, back discomfort, burns, childhood illnesses, cold symptoms, cuts, ear infections, fractured bones, joint pain, muscle injuries, rashes, sinus infections, and urinary tract infections. The urgent care clinic employs certified professionals skilled in diagnosing and treating a wide range of urgent care needs, utilizing state-of-the-art procedure rooms, examination facilities, and diagnostic equipment. The clinic provides affordable, convenient medical care as an alternative to emergency room visits for non-life-threatening conditions.
